This chapter introduces you to SMART Meeting Pro® software and to the other SMART software on your computer and explains how to get started with SMART Meeting Pro software.

About SMART Meeting Pro software room license

SMART Meeting Pro software room license is an easy-to-use whiteboard application that enhances your SMART interactive product experience. Use SMART Meeting Pro software room license to enrich three types of collaboration:

- Brainstorming sessions
- Meetings
- Presentations

Brainstorming sessions

During brainstorming sessions, you and your co-workers develop ideas using charts, tables, mind maps and other visual tools.

You can use your SMART interactive product and SMART Meeting Pro software to enrich your brainstorming sessions. Specifically, these SMART products offer solutions for the following business needs:

Business need	Solution	More information
You want to capture your notes in an electronic format.	Use the SMART interactive product's pens and eraser to write, draw and erase digital ink in SMART Meeting Pro software's Whiteboard mode. You can then save your notes in a Whiteboard (.fcw) file or export them to a PDF or PowerPoint® file.	Page 33 Page 70
You want to write notes by hand but later convert them to typed text.	Use Whiteboard mode's handwriting recognition feature to convert handwritten notes to typed text.	Page 38
You want to capture more notes than can fit in a single screen.	Use the Unbound Workspace, where pages have no defined boundaries, and the page area can be larger than the viewable area. Navigate your notes in Unbound Workspace using gestures, bookmarks and the radar view.	Page 60

Business need	Solution	More information
You want to write notes on the desktop or in other applications.	Using SMART Ink, write notes on the desktop or in other applications. You can subsequently take screen captures of these notes and include them in the Whiteboard file.	Page 13
You're having difficulty starting your brainstorming session and could benefit from templates.	The Business Gallery contains brainstorming session templates as well as other boilerplate content. You can browse this content or search for keywords. You can also contribute your own content to the Business Gallery. This is a simple but effective way to assist co-workers with their brainstorming sessions.	Page 75

Here are some tips for a successful brainstorming session:

- Invite a diverse group of participants to your brainstorming session to solicit as broad a range of opinions and ideas as possible.
- Before beginning the session, state the objective and write it on your SMART interactive product.
- Encourage all participants to contribute ideas, no matter how unique or unusual those ideas might be. In addition, invite participants to build on the ideas of other participants.
- Write notes on your SMART interactive product as ideas come up during the session. Don't organize notes during the brainstorming session. You can do this later, either at the end of the brainstorming session or afterward on your computer using SMART Meeting Pro PE software.
- Use tools such as mind maps to visualize the flow of the brainstorming session.
- If participants have SMART Meeting Pro PE software on their computers, you can distribute the notes in a Whiteboard (.fcw) file. Otherwise, you can export the notes to a PDF or PowerPoint file to distribute to the group.

Meetings

During meetings, you share information and collaborate with co-workers, business partners, customers and others. You can schedule meetings in advance or hold impromptu, ad hoc meetings as necessary. Meetings can be structured and formal like a presentation or informal and less structured like a brainstorming session.

Your SMART interactive product and SMART Meeting Pro software can accommodate all types of meetings. Specifically, your SMART products offer solutions for the following business needs:

Business need	Solution	More information
You want information and files to be available when you start your meeting.	If your organization has integrated SMART Meeting Pro software with Microsoft® Exchange, you can include information and attach files you want to reference during the meeting when you schedule a meeting in Microsoft Outlook®. When you log on to the meeting room computer at the start of the meeting, the information and files are available in the Meeting Notification window and the Organizer.	Page 16 Page 18 Page 19 Page 89
You want to have a meeting right away without having to schedule it in Outlook.	Your organization can configure SMART Meeting Pro software to create a meeting automatically when you log on to the room computer and there are no scheduled meetings for at least 30 minutes. You can then use all of the features of SMART Meeting Pro software as you would in a scheduled meeting.	Page 16
Participants need to attend your meeting remotely.	You can use Bridgit software to enable participants to attend meetings remotely. You can share video, audio and the screen with remote participants.	Page 97

Business need	Solution	More information
You need to access the Internet or applications installed on the meeting room computer during your meeting.	<p>In Desktop mode, you can interact with the operating system and applications on a meeting room computer like those on your personal computer while using the gestures and other features supported by your interactive product.</p> <p>You can use the Programs button to quickly access four Microsoft applications—Internet Explorer®, Word, Excel® and PowerPoint—if they're installed on the meeting room computer.</p> <p>You can also add shortcuts to your most frequently used applications, files, folders and websites to the Programs button menu.</p>	<p>Page 29</p> <p>Page 92</p>
You want to send notes recorded during the meeting to participants afterward.	When you end the meeting, you can choose to send notes to all participants automatically.	Page 25

Here are some tips for holding a successful meeting:

- Include a meeting agenda with the invitation. You can insert the agenda in the body of the invitation or attach it as a file. In either case, the agenda is accessible from the meeting room computer when you first log on (assuming SMART Meeting Pro software integration with Microsoft Exchange is set up).
- You can also attach minutes or action items from previous meetings and other files to the invitation. Participants can review these files before the meeting, leaving more time for discussion and assignment of action items.
- Before the meeting, determine who will chair the meeting and who will record notes. Depending on the meeting's size and subject matter, one person might complete both tasks or different people might complete each task.
- The person recording notes should either stand or sit near the SMART interactive product to use it to record notes.
- Depending on whether you're using Classic Workspace or Unbound Workspace, you can organize notes into separate pages or into bookmarked sections on the same page. You can then send the Whiteboard file to meeting participants so that they are aware of their assigned questions for followup and action items.

- The person chairing the meeting can refer to the Meeting button and Meeting Notification window to track the meeting's progress.

Presentations

In most organizations, presentations depend on extensive use of visual aids, particularly slide shows. You can use your SMART interactive product and SMART Meeting Pro software to present slide shows in an effective, interactive manner.

Your SMART products offer solutions for the following presentation business needs:

Business need	Solution	More information
You want to present a PowerPoint file using PowerPoint software.	SMART Ink integrates with PowerPoint software. When you start a PowerPoint presentation, the SMART Ink Toolbar for PowerPoint appears. You can use this toolbar to interact with the PowerPoint file from your SMART interactive product: you can navigate within the presentation and write notes over slides.	Page 13
You want to present a PowerPoint file, but PowerPoint software isn't installed on the meeting room computer.	You can open the PowerPoint file in SMART Meeting Pro software. If you're using Unbound Workspace, SMART Meeting Pro software imports all of the file's slides into a single page and marks each slide with a bookmark. You can navigate from slide to slide by pressing Next Bookmark  and Previous Bookmark  in radar view.	Page 39

Business need	Solution	More information
You want to view a file or use an application on the meeting room computer.	<p>In Desktop mode, you can interact with the operating system and applications on a meeting room computer like those on your personal computer while using the gestures and other features supported by your interactive product.</p> <p>You can use tools like Screen Shade, Spotlight and Magnifier to highlight areas of the screen.</p> <p>You can add shortcuts to these tools to the Programs button menu for easy access.</p>	<p>Page 13</p> <p>Page 29</p> <p>Page 92</p>
You want to present a large or complex topic in a visually interesting way.	<p>In Unbound Workspace, pages have no defined boundaries, and the page area can be larger than the viewable area.</p> <p>You can use Unbound Workspace to present large or detailed content, such as maps, architectural drawings and complex workflows.</p>	<p>Page 60</p>
Participants need to attend your presentation remotely.	<p>You can use Bridgit software to enable participants to attend presentations remotely.</p> <p>You can share video, audio and the screen with remote participants.</p>	<p>Page 97</p>

Here are some tips for giving a successful presentation:

- If you're new to using SMART interactive products, read the documentation and practice using the products before you give your presentation.
- When preparing your presentation, ensure all elements—particularly text elements—are visible when viewed on your SMART interactive product. Remember that the SMART interactive product and the computer you used to create your presentation might have different display settings (resolution, aspect ratio, and so on).
- Use the SMART interactive product's features to enhance your presentation. For example, you could draw lines between related concepts during the presentation rather than including the lines in the presentation.

- Use visual aids effectively. For example, instead of relying on bulleted lists, use illustrations, charts and other visual aids to represent the ideas you want to present. You can use the Business Gallery as a starting point for these visuals.
- If participants attend your presentation remotely, remember to share your screen and ask the remote participants to mute their microphones during the presentation.

Starting and exiting the software

In most situations, SMART Meeting Pro software room license starts automatically when you log on to the computer. If it doesn't, you can start the software manually or, optionally, you can start just the SMART System Menu to access SMART Settings and other options.

▶ To start SMART Meeting Pro software manually

Double-click the **SMART Meeting Pro** icon  on your desktop.

▶ To start just the SMART System Menu manually

In Windows® 7 operating system, select **Start > All Programs > SMART Technologies > SMART System Menu**.

OR

In Windows 8.1 operating system, go to the *Apps* screen, and then scroll to and select **SMART Technologies > SMART System Menu**.

OR

In Windows 10 operating system, press **Start**, and then scroll to and select **SMART Technologies > SMART System Menu**.

▶ To exit SMART Meeting Pro software

1. Press **Whiteboard**  on the SMART Business Toolbar.
2. Select **File > Exit**.

TIP

If you exit SMART Meeting Pro software, you can still access SMART Settings and other options from the SMART System Menu in the notification area.

Navigating the user interface

The SMART Meeting Pro software user interface consists of the SMART Business Toolbar, the Bridgit Collaboration Bar and four modes:

- Desktop
- Whiteboard
- View Screens
- Organizer

You switch between modes by pressing the buttons at the top of the SMART Business Toolbar.

SMART Business Toolbar

The SMART Business Toolbar appears on the left or right side of the display. It contains the following items:

- Buttons for accessing the four modes
- Meeting button
- Reset Room button
- Tools
- Move Toolbar button
- Collapse/Expand button
- Programs button

Meeting button

If Microsoft Exchange integration is enabled, you can press the **Meeting** button on the SMART Business Toolbar to open the Meeting Notification window.

Reset Room button

If you have Microsoft Exchange or SMTP email settings enabled, you can press the **Reset Room** button to end your meeting, to email your meeting notes and attachments to participants and to log off of the room computer.

Tools

You can select and use a variety of commands and tools on the SMART Business Toolbar. The tools available change according to the mode you're using.

Tool	Command	Action	Desktop mode	Whiteboard mode	View Screens mode
	Pan	Pan and zoom in or out.	No	Yes ¹	No
	Select	Select, move and manipulate objects on a Whiteboard page.	Yes	Yes	Yes
	Pen	Select pen colors and widths you can use to write notes and create freehand objects. You can also select a transparent yellow or green highlighter.	Yes	Yes	Yes
	Eraser	Erase notes and objects created with digital ink.	Yes	Yes	Yes
	Shapes	Draw a variety of shapes, including circles, rectangles, stars and squares. You can also use this tool to select solid or broken lines and arrows.	No	Yes	No
	Text	Insert text into your Whiteboard page. When you touch the page, a text box appears, in which you can select the text object's formatting.	No	Yes	No
	Gallery	Access a collection of images and content that you can use in your presentation.	No	Yes	No
	Capture	Take a screen capture of your notes and automatically insert them on a Whiteboard page. Open a list of three options so you can capture the full screen, a rectangular selection or a freehand selection of the screen.	Yes	No	Yes

¹When in Unbound Workspace

Tool	Command	Action	Desktop mode	Whiteboard mode	View Screens mode
	Undo	Reverse the effect of the last action. You can undo several actions by selecting Undo repeatedly.	No	Yes	No
	Redo	Reinstate the last action reversed with the Undo command.	No	Yes	No
	Normal View	Restore the Whiteboard page to Normal view.	No	Yes ²	No
	Previous Page	Display the previous page of the current file. You can also press the PAGE UP key on your keyboard.	No	Yes ³	No
	Next Page	Display the next page of the current file. You can also press the PAGE DOWN key on your keyboard. (Pressing Next Page on the last page inserts a new page.)	No	Yes ⁴	No

Move Toolbar button

You can move the SMART Business Toolbar to either side of the screen by pressing the **Move Toolbar** button.

Collapse/Expand button

You can collapse or expand the SMART Business Toolbar by pressing the **Collapse/Expand** button.

Programs button

You can quickly access popular applications and tools by pressing the **Programs** button.

Bridgit Collaboration Bar

If Bridgit® conferencing software integration is enabled, you can use the Bridgit Collaboration Bar to create a meeting, invite meeting participants, share your screen and join meetings created by others. You can also chat with meeting participants.

²When in Full Whiteboard view

³When in Full Whiteboard view

⁴When in Full Whiteboard view

Desktop mode

In Desktop mode, you can interact with the room computer's applications.

Whiteboard mode

In Whiteboard mode, you can create or open Whiteboard files to brainstorm and present ideas.

Whiteboard mode consists of three main areas:

- Menu bar
- Whiteboard drawing area
- Page Sorter

Menu bar

The Whiteboard menu bar includes the following menu items:

Menu item	Description
File	Allows you to create, open, save, print, email and close files.
Edit	Provides tools to undo and redo actions; cut, copy and paste objects; clone and delete objects; select all objects and clear and delete pages.
View	Allows you to select Full Whiteboard view and to view the Business Gallery.
Insert	Allows you to add blank pages, images and links to your file.
Object	Allows you to lock, group, flip, order and change the properties of objects.
Help	Provides access to Help and information about SMART Meeting Pro software and allows you to enable or disable the SMART Customer Experience program.

Whiteboard drawing area

Most of Whiteboard mode is dedicated to the Whiteboard drawing area, which displays the contents of a selected page in a file. This is where you write notes and create and work with objects.

Page Sorter

The Page Sorter displays all the pages in the open file as thumbnails and updates the thumbnails automatically as you change the contents of the pages. Using the Page Sorter, you can add, delete and rearrange pages.

View Screens mode

View Screens mode shows other meeting participants' screens (if they're sharing their screens) or meeting information (if otherwise).

Organizer

You can use the Organizer to manage multiple screens and windows. You can view at a glance all open applications, files and Whiteboard pages and easily switch between them. If you enabled Microsoft Exchange integration, you can access the meeting details through the Organizer.

About the other SMART software on your computer

Typically, computers that have SMART Meeting Pro software installed also include the following SMART software:

SMART Product Drivers	The interactive product detects contact with its screen and sends each contact point, along with Pen tool information, to the connected computer. SMART Product Drivers translates the information into mouse clicks and digital ink. SMART Product Drivers enables you to perform normal computer operations by using your finger or a pen.
SMART Ink	Using SMART Ink, you can write or draw on the screen in digital ink using a pen, and then save or erase your notes.
SMART Tools	You can draw attention to specific parts of a page using SMART Tools, such as the Screen Capture toolbar, Screen Shade and Spotlight.
Bridgit software	Bridgit software enables you to share your screen, create and join meetings and connect with others.

Resources for users

In addition to this guide, other resources are available for SMART Meeting Pro software users.

Help

For more information about SMART Meeting Pro software, refer to the SMART Meeting Pro software Help. The Help includes all of the information in this guide as well as information about SMART Product Drivers, SMART Ink and SMART Board Tools. You can view the Help on your SMART interactive product or on a mobile device.

To open the Help, press the **SMART Board** icon  in the notification area, and then select **Help** or press any of the **Help** buttons and links in the SMART software.

You can view the Help on your mobile device by scanning the QR code on the cover of this guide.

Training

The SMART training website (smarttech.com/training) includes an extensive library of training resources you can refer to when learning how to use SMART Meeting Pro software.

Support center and knowledge base

The Support center (smarttech.com/support) contains a library of documents, including this guide, and a knowledge base that you can search when troubleshooting issues.

SMART Meeting Pro software integrates with Microsoft Exchange and other software to provide a seamless meeting experience.

You can schedule meetings from your personal computer using Microsoft Outlook. When you log on to the room computer, SMART Meeting Pro software and Bridgit software can start automatically. You can begin using the SMART interactive product and connect with others immediately.

The Meeting Notification window indicates the progress of your meeting. If you need more time and the room is available, you can extend the meeting.

When your meeting is done, you can reset the room computer securely while emailing notes and attached files to meeting attendees.

About meeting software

SMART Meeting Pro software integrates with Microsoft Exchange and Bridgit software to automate meetings and facilitate collaboration.

SMART Meeting Pro software

For best use of SMART Meeting Pro software, use the meeting owner's network credentials to log on to the meeting room computer. After SMART Meeting Pro software starts, you can use the Meeting Notification window and the Bridgit Collaboration Bar to manage your meeting.

Microsoft Exchange

Use your Outlook calendar to schedule meetings and send invitations. When you include a room in the invitation, you can access the meeting details from SMART Meeting Pro software when you log on to the room computer.

Use the Meeting Notification window to access meeting details from your Outlook calendar. You can start your meeting and monitor the room schedule as the meeting progresses. The Meeting Notification window provides status updates and alerts you when your scheduled meeting time is about to end. See *Accessing meeting details using the Meeting Notification window* on page 18 for more information.

Bridgit software

If you use SMART Meeting Pro software with Bridgit software integration enabled, remote participants can join your meeting using Bridgit software. When SMART Meeting Pro software starts, a Bridgit meeting and a password are automatically created. To start the meeting, communicate the meeting name and password to the remote participants and share your screen with them once they join.

Microsoft Exchange integration enables other meeting rooms to automatically join your Bridgit meeting (see *Scheduling Bridgit meetings* on page 99).

NOTE

This feature is not supported by Office 365™-hosted Microsoft Exchange servers.

Starting a meeting

SMART Meeting Pro software integration with Microsoft Exchange enables you to start a scheduled meeting or an impromptu, ad hoc meeting when you log on to a room computer. Depending on the availability of the room, meetings can be started automatically or manually.

 **NOTES**

- To access all features of a scheduled meeting, the meeting owner must log on to the room computer with his or her network credentials.
 - If more than one meeting is scheduled, a list of meetings to choose from might appear (see *Refreshing the list of scheduled meetings* below).
-

Starting a scheduled meeting

A scheduled meeting starts automatically at the designated time when the meeting owner logs on to the room computer. This setting can be changed (see *Changing Microsoft Exchange integration settings* on page 89).

Starting an ad hoc meeting

An ad hoc meeting starts automatically when you log on to the room computer and the room is available for at least the next 30 minutes. This setting can be changed (see *Changing Microsoft Exchange integration settings* on page 89).

Starting a meeting manually

▶ **To start a meeting manually**

Press **Meeting**  on the SMART Business Toolbar, and then select **Start Meeting** .

If the meeting is scheduled and you're the meeting owner, the meeting starts immediately.

OR

If the meeting is scheduled and you aren't on the list of invited participants, you're prompted for your network credentials.

OR

If the meeting is unscheduled and the room is available, you can press **Book Room**  to start an ad hoc meeting manually.

Refreshing the list of scheduled meetings

If multiple meetings are scheduled at the same time, the correct meeting should start automatically when the meeting owner logs on to the room computer.

If there's more than one meeting scheduled at the same time, a list of scheduled meetings to choose from might appear. A maximum of three meetings can be displayed. You can refresh the list of scheduled meetings if the meeting you want to start doesn't appear.

▶ **To refresh the list of scheduled meetings**

1. Press **Meeting**  on the SMART Business Toolbar, and then select **Start Meeting** .

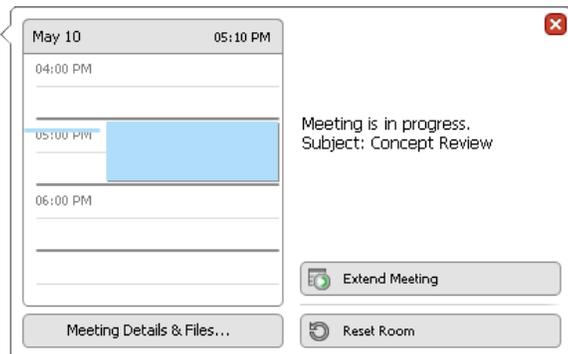

A list of scheduled meetings and the following message appear:

If the meeting you want to attend isn't listed, start and then exit meetings to refresh the list.

2. Select one of the meetings.
A "Meeting is in progress" message appears.
3. Press **Reset Room** to end the meeting immediately (see *Ending the meeting* on page 25).
4. Press **Meeting**  on the SMART Business Toolbar, and then select **Start Meeting**  to see an updated list of scheduled meetings.
5. Repeat steps 1 to 4 to refresh the meetings list until the meeting you want to start appears.

Accessing meeting details using the Meeting Notification window

The Meeting Notification window enables you to quickly access the meeting details and the room's schedule. You can monitor the meeting and receive status updates as the meeting progresses. At the end of the scheduled time, you can extend the meeting or you can end the meeting and send the meeting notes to participants.

► **To access meeting details using the Meeting Notification window**

Press **Meeting**  on the SMART Business Toolbar.

The Meeting Notification window appears and displays the following information:

Area	Contents
Schedule	The room's schedule appears on the left side. Scheduled meetings appear in gray. The current meeting appears in blue. Your name appears if you're the meeting owner, you've logged into the computer with your network credentials and the room computer accepted your meeting invitation in Outlook.
Meeting Details & Files	Press this button to view the meeting details in Organizer mode.
Status Messages	Status messages appear in the top-right of the window as the meeting progresses.
Meeting options	The <i>Reset Room</i> button appears in the bottom-right of the window. Other buttons, such as <i>Start Meeting</i> and <i>Book Room</i> can also appear depending on the schedule of the room.

Accessing meeting details using the Organizer

The lower section of the Organizer has three tabs:

- Meeting
- Pages
- Applications

The Meeting tab consists of the following areas:

Area	Contents
Schedule	The room's schedule appears in this area. Scheduled meetings appear in gray. The current meeting appears in blue. Your name appears if you're the meeting owner, you've logged into the computer with your network credentials and the room accepted your meeting invitation in Outlook.
Meeting Information	The meeting name, subject, schedule and any additional details in your meeting invitation appear in this area. You can insert this information in your Whiteboard file to use as an agenda.
Meeting Attendees	The meeting attendees and their invitation acceptance statuses appear in this area. You can also view contact information.
Attachments	Documents attached to the meeting invitation appear in this area.

You can use the Meeting tab to insert meeting details in your Whiteboard file, to view invitees' statuses, to book a room and to access and save attached documents.

Inserting meeting details in the Whiteboard file

Meeting details are automatically inserted as an agenda in the Whiteboard file when the meeting starts. This setting can be changed.

If you disabled this feature (see *Changing Microsoft Exchange integration settings* on page 89), you can insert meeting details in the Whiteboard file manually.

▶ To insert meeting details in the Whiteboard file manually

1. Press **Organizer**  on the SMART Business Toolbar, and then select the **Meeting** tab.
2. Press **Insert Meeting Details in Whiteboard File**.

The meeting details appear on the first page of the Whiteboard file.

You can also insert meeting details without the attendees list by pressing **Menu** in the *Meeting Information* area, and then selecting **Insert in Whiteboard File**.

Viewing an invitee's status

You can view the meeting invitees' status to find out whether they accepted or declined your meeting invitation. You can also view their contact information.

▶ **To view an invitee's status**

1. Press **Organizer**  on the SMART Business Toolbar, and then select the **Meeting** tab.
2. Locate the invitee's name in the *Meeting Attendees* area.

Status	Appearance of the invitee's name
The invitee accepted the meeting.	Appears in green text
The invitee declined the meeting.	Appears in red text
The invitee tentatively accepted the meeting.	Is followed by <i>Tentative</i>
The invitee hasn't responded to your meeting invitation.	Is followed by <i>Unknown</i>
OR	
You aren't authorized to view the invitee's information.	

 **NOTE**

Only the meeting owner can view an invitee's status.

 **TIP**

To view an invitee's contact information, press the **Information**  button that appears beside the invitee's name.

Booking a room

If a room is available for the next 30 minutes, SMART Meeting Pro software automatically reserves it and starts an ad hoc meeting when you log into the room computer.

If you disabled this feature (see *Changing Microsoft Exchange integration settings* on page 89), you can manually book the room.

▶ **To book a room manually**

1. Press **Organizer**  on the SMART Business Toolbar, and then select the **Meeting** tab.
The Meeting tab displays the room's availability status (in blue text).
2. Press the plus or minus buttons to book the room for a longer or shorter time.

3. Press **Book Room** .

SMART Meeting Pro software reserves the room and starts an ad hoc meeting.

 **TIP**

Watch the messages in the Meeting Notification window to monitor the meeting's progress (see *Monitoring the meeting's progress* on the facing page).

Opening attached documents

You can open copies of the documents attached to your meeting invitation, optionally choosing the display on which the documents appear. You can also save attached documents.

 **NOTE**

If you modify an attached document, you must save it to a new location before you end the meeting. Modifications won't appear in the original meeting attachment.

▶ To open an attached document on the current display

1. Press **Organizer**  on the SMART Business Toolbar, and then select the **Meeting** tab.
2. Double-click a document thumbnail in the *Attachments* area.
A copy of the document opens on the current display.

▶ To open an attached document on a different display

1. Press **Organizer**  on the SMART Business Toolbar, and then select the **Meeting** tab.
2. Drag the document thumbnail from the *Attachments* area to a display's thumbnail at the top of the Organizer.
A copy of the document opens on that display.

Saving attached documents

If you modify an attached document, you must save it to a new location before you end the meeting. Modifications won't appear in the original meeting attachment.

▶ To save attached documents

1. Press **Organizer**  on the SMART Business Toolbar, and then select the **Meeting** tab.
2. In the *Attachments* area, select the document you want to save.

3. Press **Menu** in the *Attachments* area, and then select **Save As**.

The *Save As* dialog box appears.

4. Browse to where you want to save the file.
5. Press **Save**.

Monitoring the meeting's progress

The Meeting Notification window generates the following alerts:

- **Status messages**

As the meeting progresses, the Meeting Notification window presents the following status messages:

Status message	Description
Starting meeting	The scheduled meeting has started.
Meeting is in progress	The meeting is in progress and has more than five minutes remaining.
5 minute(s) left in meeting	You have five minutes or fewer left in the meeting. The message refreshes every minute until the meeting ends.
This meeting passed its scheduled end time	The scheduled meeting is over.
Upcoming meeting	Another meeting is scheduled to start in this room within the next 30 minutes.
Updating schedule	SMART Meeting Pro software has started and is retrieving information from the Microsoft Exchange server.
Room is available	No other meetings are scheduled to start in this room within the next 30 minutes.
You aren't invited to the upcoming meeting	A meeting in which you're not a participant in is starting in the next 30 minutes.

- **Meeting progress**

As the meeting progresses, the Meeting button changes color to indicate the following:

Button	Description
	The Meeting button is green if you have more than 15 minutes left in the meeting.
	The Meeting button turns orange if you have 15 minutes or fewer left in the meeting.
	The Meeting button turns red if you have five minutes or fewer left in the meeting.

- **Five-minute reminder**

When there are five minutes left in the meeting, a reminder appears in the Meeting Notification window. You can select one of the following options:

Button	Description
	Press to extend the meeting for 30 minutes.  NOTE You can extend the meeting if no other meetings are scheduled in the next 30 minutes.
	Press to be reminded again in five minutes.
	Press to ignore the reminder.  NOTE The reminder doesn't appear again if you select this option.
	Press to end the meeting now.

Extending the meeting

You can extend the meeting if you need more time.

NOTES

- You can extend the meeting only when there are no other meetings scheduled in the next 30 minutes.
 - This feature is not supported by Office 365-hosted Microsoft Exchange servers.
-

▶ **To extend the meeting**

Press **Meeting**  on the SMART Business Toolbar, and then select **Extend Meeting** .

The meeting schedule extends by 30 minutes.

Ending the meeting

You can use the Reset Room feature to end the meeting, to email the meeting notes and attachments to participants and to log off of the room computer.

If you're running a meeting using Bridgit software, using the Reset Room feature disconnects remote meeting participants.

 **NOTE**

The Reset Room feature automatically activates five minutes after the meeting ends. You can change this behavior (see *Changing Microsoft Exchange integration settings* on page 89).

▶ **To end the meeting (Microsoft Exchange integration enabled)**

1. Press **Reset Room**  on the SMART Business Toolbar.

The *Meeting wrap-up* dialog box appears.

2. Select the Whiteboard file formats you want to attach to your email in the *E-mail the following file(s)* area.

 **NOTE**

You can attach the Whiteboard file in .fcw, .pdf and .ppt formats. Consider which software the email recipients are most likely to have.

3. Optionally, press **Add Attachments** to attach additional files to your email.

4. Press one of the following buttons:
 - **E-mail [Owner]**  to email the Whiteboard file and attachments to the meeting owner, and then end the meeting
 - **E-mail All Invitees**  to email the Whiteboard file and attachments to all meeting invitees, and then end the meeting
 - **Don't Send E-mail**  to end the meeting without emailing the Whiteboard file and attachments
 - **Cancel Reset Room**  to cancel the request to end the meeting
5. Press one of the following buttons:
 - **Log Off**  to end the meeting and log off the room computer

→ **IMPORTANT**

Be sure to save all files before you press this button.

- **Don't Log Off**  to end the meeting but stay logged in to the room computer
- **Cancel Reset Room**  to cancel the request to end the meeting

▶ **To end the meeting (email client configured)**

1. Press **Reset Room**  on the SMART Business Toolbar.
A dialog box appears.
2. Optionally, select **Log off when the meeting ends**.

 **NOTE**

If you select this check box, you will be logged off of the room computer.

3. Optionally, select **E-mail meeting notes**.
4. Press **OK**.
The *Attachment* dialog box appears.
5. Type a name for the Whiteboard file in the *File name* box.

6. Select a file format from the *File type* drop-down list.

You can attach the Whiteboard file in .fcw, .pdf, .ppt and .pptx formats. Consider which software the email recipients are most likely to have.

7. Press **OK**.
An email form is automatically generated.
8. Complete the email form, and then press **Send**.

Chapter 3

Interacting with applications in Desktop mode

Using the interactive display to interact with applications	29
Using the Programs button	30
Moving applications across displays	30
Moving applications across displays using the Organizer	30
Moving applications across displays using the Window Shift buttons	31

You can interact with the computer's operating system and applications using the gestures and other features supported by the interactive display. To view the computer's desktop and use its applications, press **Desktop** on the SMART Business Toolbar to enter Desktop mode.

TIP

If you're using a room license and there are multiple interactive displays connected to the computer, you can move applications from one display to another.

Using the interactive display to interact with applications

You can use the interactive display to interact with applications as you do with a mouse and keyboard. Specifically, you can do the following:

- Select objects and clear the selection of objects (in other words, left-click objects)
- Double-click objects
- Right-click objects
- Move objects
- Resize objects
- Rotate objects
- Display pages in a document

- Zoom in and out
- Pan

Using the Programs button

You can use the Programs button to quickly access four Microsoft applications—Internet Explorer, Word, Excel or PowerPoint—if they're installed on the computer.

TIPS

- You can add shortcuts to your most frequently used applications, files, folders and websites (see *Customizing the Programs button menu* on page 92 for more information).
 - You can also add links to SMART Tools.
-

To access applications and tools

Press **Programs**  on the SMART Business Toolbar, and then select the program or tool of your choice.

Moving applications across displays

If the computer is connected to multiple interactive displays, you can move applications from one display to another using the Organizer or the Window Shift buttons.

Moving applications across displays using the Organizer

The lower section of the Organizer has three tabs:

- Meeting
- Pages
- Applications

The Applications tab displays thumbnails of all applications running on the computer. The application thumbnails update as the applications themselves change.

▶ **To move an application to the current display**

1. Press **Organizer**  on the SMART Business Toolbar, and then select the **Applications** tab.
2. Double-click the application's thumbnail.

SMART Meeting Pro software switches to Desktop mode, and the application appears on the display. If the application was open on another display, it moves from that display to the current display.

▶ **To move an application to another display**

1. Press **Organizer**  on the SMART Business Toolbar, and then select the **Applications** tab.
2. Drag the application's thumbnail to the display's thumbnail.

The application appears on the display.

If you press **Identify Screens**, a unique red number appears on each display and its thumbnail so that you can determine the thumbnail for each display.

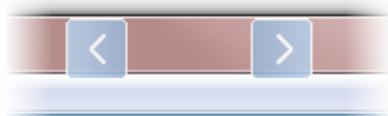

Moving applications across displays using the Window Shift buttons

When you use SMART Meeting Pro software room license in a multiple display system, you can use the Window Shift buttons to move an application to another display. Because applications can appear on only one display at a time, this feature allows you to send an application to another display where another user can work with it.

▶ **To move an application to another display**

1. Press the title bar of the application you want to move.

The Window Shift buttons appear in the title bar.

2. Press either the left or right button to move the application to another display.

 **NOTE**

The left button moves the application to the next lower numbered display, and the right button moves the application to the next higher numbered display. To view the display's numbers, Press **Organizer**  on the SMART Business Toolbar, select the **Applications** tab, and then press **Identify Screens**.

Chapter 4

Inserting objects in Whiteboard mode

Writing and drawing in digital ink	33
Erasing digital ink	34
Creating shapes and lines	35
Typing, editing and formatting text	37
Converting handwriting to typed text	38
Inserting images	39
Inserting PowerPoint presentations	39
Inserting PDF files	40

You can insert the following types of objects in SMART Meeting Pro software:

- Digital ink
- Shapes and lines
- Text
- Images
- PowerPoint presentations
- PDF files

Writing and drawing in digital ink

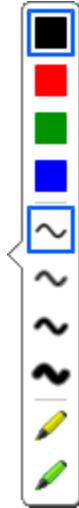

In Whiteboard mode, you can use your interactive display's pen or the Pen tool on the SMART Business Toolbar to write or draw in digital ink.

▶ To write or draw in digital ink when connected to a SMART interactive display

Use the SMART interactive product's pen and SMART Ink (see *About the other SMART software on your computer* on page 13).

▶ **To write or draw in digital ink when not connected to a SMART interactive display**

1. Press **Pen**  on the SMART Business Toolbar, and then select a color and line thickness.

 **TIPS**

- You can also select a transparent yellow or green highlighter.
- You can write or draw in either calligraphic ink or regular ink (see *Changing Whiteboard mode settings* on page 83).

2. Write or draw in digital ink.

Erasing digital ink

You can erase digital ink using your interactive display's eraser or the Eraser tool.

▶ **To erase digital ink when connected to a SMART interactive product**

Use the SMART interactive product's eraser and SMART Ink (see *About the other SMART software on your computer* on page 13).

▶ **To erase digital ink when not connected to a SMART interactive product**

1. Press **Eraser**  on the SMART Business Toolbar, and then select an eraser size.

2. Erase digital ink using one of the tools available for your interactive product.

 **TIP**

To erase digital ink in a large area, circle the area and then tap in the center of the circle.

Creating shapes and lines

You can create a variety of geometric shapes and lines.

▶ **To create a shape**

1. Press **Shapes**  on the SMART Business Toolbar, and then select a shape.

 **NOTE**

If you don't select a shape, SMART Meeting Pro software uses the last shape or line you selected.

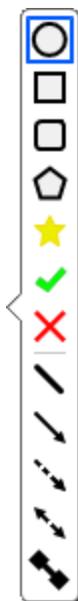

2. Create a shape by pressing the screen where you want to place the shape and dragging until the shape is the size you want.
-

 **TIP**

You can create perfect circles, squares, triangles and other shapes by holding down SHIFT as you draw the shape. To resize a shape while maintaining its proportions, hold down SHIFT as you resize the shape.

 **To create a line**

1. Press **Shapes**  on the SMART Business Toolbar, and then select a line.

 **NOTE**

If you don't select a line, SMART Meeting Pro software uses the last shape or line you selected.

2. Create a line by pressing the screen where you want the line to start and dragging to where you want the line to end.

 **TIP**

You can create lines at perfect 45° increments by holding down the SHIFT key as you draw the line. To resize a line while maintaining its angle, hold down the SHIFT key as you resize the line.

Typing, editing and formatting text

In Whiteboard mode, you can create typed text by using a keyboard connected to the computer or an on-screen keyboard. After creating text, you can edit it and change its font, size and other properties.

▶ To type text

1. Press **Text**  on the SMART Business Toolbar, and then press the screen where you want the text to appear.

The *Fonts* toolbar appears above the text box. You can use this toolbar to change the font, size and alignment. You can also use the *Fonts* toolbar to format text you already typed.

2. Begin typing using the keyboard connected to your computer or an on-screen keyboard.
3. When you finish typing text, press anywhere outside the text box or press the ESC key.

The text is now a separate object that you can select, edit, resize and move.

▶ To edit or format text

1. Double-click the text.

The *Fonts* toolbar appears.

2. Select the text you want to change by dragging over it (just as you would in a word-processing program).
3. Type the new text.

OR

Use the options in the toolbar to change the formatting, including font, size and style.

4. After you finish, press anywhere outside the text box or press the ESC key.

 **TIPS**

- You don't need to change the position of rotated text before you edit it. Double-click the text object to make it rotate to a horizontal position, making it easier to edit. As soon as you press outside the text box, it returns to its original rotation.
 - You can also format the entire text object using the *Selection Properties* dialog box (see *Changing objects' properties* on page 43).
-

▶ **To resize a text box**

1. Double-click the text.
The *Fonts* toolbar appears.
2. Drag one of the sizing handles to resize the text box.
3. After you finish, press anywhere outside the text box or press the ESC key.

 **NOTE**

Using this procedure to resize a text box changes the way text wraps inside the box. Using the procedure in *Resizing objects* on page 48 changes the size of the text.

Converting handwriting to typed text

You can convert any note that you write in the Whiteboard drawing area to typed text.

 **TIP**

The accuracy of the conversion depends on your handwriting. SMART Meeting Pro software more accurately interprets neater printing on a horizontal line. Although SMART Meeting Pro software can convert slanted or cursive writing, the results can be inconsistent.

▶ **To convert handwriting to typed text**

1. Select the handwritten note.
2. Press the menu arrow, and then select **Convert to Text**.

The object menu appears with possible word options to insert as text.

3. Select a word option.

The word appears as typed text.

You can also select multiple handwritten words and then convert them all to typed text.

Inserting images

You can easily insert images in Whiteboard pages, where you can then move, size and rotate them as you would any object. Whiteboard mode supports BMP, JPEG, TIFF, PNG, GIF and WMF file formats.

▶ To insert an image

1. Select **Insert > Image**.

The *Select Image* dialog box appears.

2. Browse to the image you want to insert, select it, and then press **Open**.

The image appears as an object in the upper-left corner of the page.

Inserting PowerPoint presentations

You can insert PowerPoint presentations into Whiteboard files.

You can insert PowerPoint presentations only if PowerPoint is installed on your computer.

▶ To insert a PowerPoint presentation

1. Save any changes to the current Whiteboard file.

2. Select **File > Open**.

The *Open* dialog box appears.

3. Select **Microsoft PowerPoint (*.ppt; *.pptx)** in the drop-down list.
4. Browse to and select the PowerPoint presentation you want to insert.
5. Press **Open**.

6. Press **OK**.

If you're displaying pages in Classic Workspace, SMART Meeting Pro software places each slide in the PowerPoint file on its own page. Navigate from slide to slide by pressing **Next Page**  and **Previous Page**  in the Page Sorter (see *Displaying pages* on page 58).

OR

If you're displaying pages in Unbound Workspace, SMART Meeting Pro software places all slides in the PowerPoint file on a single page with bookmarks marking the location of each slide. Navigate from slide to slide by pressing **Next Bookmark**  and **Previous Bookmark**  in radar view (see *Displaying pages in Unbound Workspace* on page 60).

Inserting PDF files

You can insert PDF files into Whiteboard files.

To insert a PDF file

1. Save any changes to the current Whiteboard file.
2. Select **Insert > Document**.
The *Open* dialog box appears.
3. Browse to and select the PDF file you want to insert.
4. Press **Open**.

SMART Meeting Pro software places all pages in the PDF file on a single page in the Whiteboard file.

If you're displaying pages in Unbound Workspace, you can navigate PDF pages by pressing **Next Bookmark**  and **Previous Bookmark**  in radar view (see *Displaying pages in Unbound Workspace* on page 60).

Chapter 5

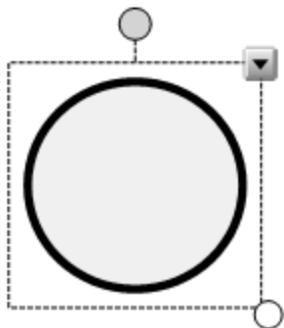

Working with objects in Whiteboard mode

Selecting objects	42
Changing objects' properties	43
Moving objects	44
Moving objects to another page	45
Rearranging stacked objects	45
Locking objects	46
Cutting, copying and pasting objects	47
Cloning objects	48
Resizing objects	48
Using the resize handle	49
Using the scale gesture	49
Rotating objects	50
Using the rotation handle	51
Using the rotate gesture	51
Flipping objects	52
Grouping objects	52
Grouping objects manually	52
Grouping objects automatically	52
Linking objects	53
Creating standalone links	54
Deleting objects	54
Undoing and redoing changes	55

After creating an object, you can select it and work with it.

Selecting objects

Before you can work with an object, you must select it. You can select an individual object, multiple objects or all objects on a page. When you select an object, a selection rectangle surrounds the object.

The white circle in the object's lower-right corner is a resize handle (see *Resizing objects* on page 48).

The gray circle above the object is a rotation handle (see *Rotating objects* on page 50).

The downward arrow in the object's upper-right corner is a menu arrow. Press the menu arrow to display a menu of commands.

 **NOTE**

Pressing an object's menu arrow gives you access to the same menu as right-clicking the object.

 **To select an object**

1. Press **Pan**  or **Select**  on the SMART Business Toolbar.
2. Press the object you want to select.

A selection rectangle appears around the object.

 **NOTE**

If you press an object and a lock symbol appears instead of the menu arrow, the object is locked. You must unlock the object before you can manipulate it (see *Locking objects* on page 46).

▶ **To select multiple objects**

1. Press **Select**  on the SMART Business Toolbar.
2. Drag until a rectangle surrounds the objects you want to select.

OR

Hold down CTRL, and then press the objects you want to select.

Selection rectangles appear around the selected objects.

 **NOTE**

If you draw a rectangle around multiple objects and some of the objects are locked (see *Locking objects* on page 46), you select only the unlocked objects.

▶ **To select all objects on a page**

Select **Edit > Select All**.

Selection rectangles appear around all objects on the page.

 **NOTE**

If some of the objects are locked (see *Locking objects* on page 46), you select only the unlocked objects.

Changing objects' properties

You can change an object's properties. The properties you can change depend on the object you select. You can also select several objects and change their properties at the same time.

In the *Selection Properties* dialog box, all the properties you can change are listed on the left, and a preview pane on the right shows you how a modified object will look before you press **OK**.

▶ **To change an object's properties**

1. Select the object.
2. Press the object's menu arrow, and then select **Properties**.

The *Selection Properties* dialog box appears.

- Use the controls in the dialog box to change the object's properties:

Controls	Procedure	Digital ink	Shapes	Lines	Text	Images
Outline Color	Select a color or press More to define a custom color.	Yes	Yes	Yes	Yes	No
Fill Color	Select a color or press More to define a custom color.	No	Yes	No	No	No
Line Thickness	Select a line thickness.	Yes	Yes	Yes	No	No
Line Style	Select a line style: solid, dashed and more. The <i>Start</i> and <i>End</i> properties let you put arrowheads, circles, squares or diamonds at the beginning or end of a line.	No	No	Yes	No	No
Transparency	Select a degree of transparency.	Yes	Yes	Yes	Yes	Yes
Text	Adjust the font, size and style.	No	Yes ¹	No	Yes	No

- Click **OK**.

Moving objects

You can move objects to another position on the page.

NOTE

Locked objects cannot be moved (see *Locking objects* on page 46).

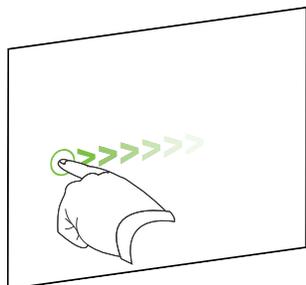

To move an object or objects

- Select the object or objects.
- Drag the object or objects to a new position on the page.

¹Text controls are only available for shapes that contain text.

▶ **To flick an object**

1. Select the object.
2. Quickly flick your finger in any direction.

Moving objects to another page

You can move objects to another page in a file.

▶ **To move an object or objects to another page**

1. Select the object or objects you want to move.
2. Drag the object or objects into the Page Sorter and onto the thumbnail of the page you want to move the objects to.

Rearranging stacked objects

If objects overlap on a page, you can rearrange the order of the stack (that is, you can control which objects appear in front of others).

 **NOTE**

Locked objects cannot be rearranged within a stack (see *Locking objects* on the next page).

▶ **To move an object to the front of the stack**

1. Select the object.
2. Press the object's menu arrow, and then select **Order > Bring to Front**.

▶ **To move an object to the back of the stack**

1. Select the object.
2. Press the object's menu arrow, and then select **Order > Send to Back**.

▶ **To move an object one place forward in the stack**

1. Select the object.
2. Press the object's menu arrow, and then select **Order > Bring Forward**.

▶ **To move an object one place backward in the stack**

1. Select the object.
2. Select the object's menu arrow, and then select **Order > Send Backward**.

Locking objects

You can lock an object to prevent its modification, movement or rotation.

You can remove this lock at any time.

▶ **To lock an object**

1. Select the object.
2. Press the object's menu arrow, and then select **Lock in Place**.

The object can't be moved, rotated or modified until you unlock it.

 **NOTE**

If you select a locked object, a lock icon  appears instead of a menu arrow.

▶ **To unlock an object**

1. Select the object.
2. Press the object's lock icon , and then select **Unlock**.

Cutting, copying and pasting objects

You can cut, copy and paste objects—including text, images, lines and shapes.

TIPS

- In addition to cutting, copying and pasting objects within SMART Meeting Pro software, you can cut, copy and paste content between SMART Meeting Pro software and other applications.
 - You can create an exact copy of an object by cloning it (see *Cloning objects* on the next page).
-

To cut and paste an object

1. Select the object.
2. Press the object's menu arrow, and then select **Cut**.

NOTE

If the object is locked, select **Edit > Cut** (see *Locking objects* on the previous page).

3. If you want to paste the object onto a different page, display that page.
4. Select **Edit > Paste**.

To copy and paste an object

1. Select the object.
2. Press the object's menu arrow, and then select **Copy**.

NOTE

If the object is locked, select **Edit > Copy** (see *Locking objects* on the previous page).

3. If you want to paste the object onto a different page, display that page.
4. Select **Edit > Paste**.

Cloning objects

You can create a duplicate of an object by using the Clone feature.

 **NOTE**

You can also copy and paste objects, including text, images, lines and shapes (see *Cutting, copying and pasting objects* on the previous page).

 **To clone an object**

1. Select the object.
2. Press the object's menu arrow, and then select **Clone**.

A duplicate object appears on the page.

 **TIPS**

- You can clone an object an unlimited number of times.

- You can also clone an object by holding down the CTRL key, selecting the object, and then dragging the object.
-

Resizing objects

You can resize objects on a page.

 **NOTE**

Locked objects cannot be resized (see *Locking objects* on page 46).

Using the resize handle

The white circle in the lower-right corner of the selected object is a resize handle.

▶ To resize an object

1. Select the object.
2. Press the object's resize handle, and then drag it to make the object larger or smaller.

 **NOTE**

To keep the shape's original height-to-width ratio, hold down **SHIFT** while you drag the resize handle.

▶ To resize multiple objects

1. Group the objects, and then select the group (see *Grouping objects* on page 52).
A selection rectangle appears around the group.
2. Press the resize handle in the lower-right corner of the selection rectangle.
3. Drag the resize handle to increase or decrease the objects' size.

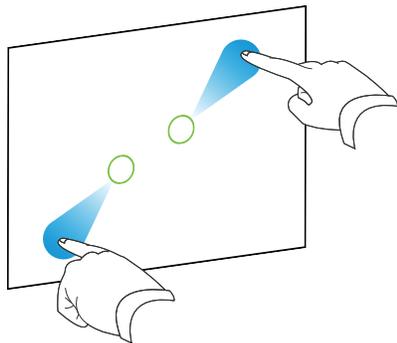

Using the scale gesture

You can also make objects larger or smaller with the scale gesture.

▶ To resize an object

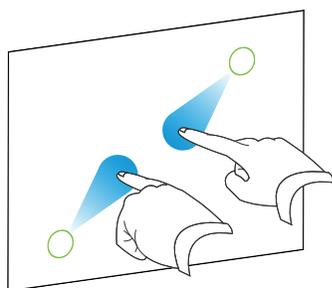

1. Select the object.
2. Using one finger on each hand, press the screen at opposite ends of the object.

3. Drag your fingers away from each other to make the object larger.

OR

- Drag your fingers toward each other to make the object smaller.

► **To resize multiple objects**

1. Select the objects.
2. Using one finger on each hand, press the screen at opposite ends of one of the objects.
3. Drag your fingers away from each other to increase the objects' size.

OR

- Drag your fingers toward each other to decrease the objects' size.

Rotating objects

The gray circle above a selected object is the rotation handle.

 **NOTE**

Locked objects cannot be rotated (see *Locking objects* on page 46).

Using the rotation handle

▶ To rotate an object

1. Select the object.
2. Press the object's rotation handle, and then drag it in the direction you want to rotate the object.

▶ To rotate multiple objects

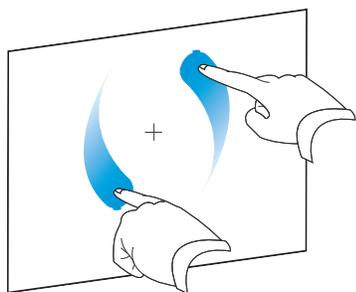

1. Select the objects.
A selection rectangle appears around each object.
2. Press the rotation handle on any one of the selected objects, and then drag it in the direction you want to rotate the objects. When you rotate one object, the other selected objects rotate automatically.

Using the rotate gesture

You can also rotate objects using the rotate gesture.

▶ To rotate an object

1. Select the object.
2. Using one finger on each hand, press the screen at opposite ends of the object.
3. Move your fingers in a circle around the center of the object to rotate it.

▶ To rotate multiple objects

1. Select the objects.
2. Using one finger on each hand, press the screen at opposite ends of one of the objects.
3. Move your fingers in a circle.

Flipping objects

You can flip an object on a page.

 **NOTE**

Locked objects cannot be flipped (see *Locking objects* on page 46).

▶ **To flip an object**

1. Select the object.
2. Press the object's menu arrow, and then select **Flip > Left/Right** or **Flip > Up/Down**.

▶ **To flip multiple objects**

1. Select the objects.
2. Press the menu arrow on any one of the selected objects, and then select **Flip > Left/Right** or **Flip > Up/Down**.

Grouping objects

You can create a group of objects, which lets you interact with all grouped items at the same time. After you create a group, you can select, move, rotate or resize the group as if it were a single object. To interact with an individual object in a group, ungroup the objects first.

Grouping objects manually

▶ **To group objects**

1. Select the objects.
2. Press the menu arrow of any one of the selected objects, and then select **Grouping > Group**.

▶ **To ungroup objects**

1. Select the group.
2. Press the group's menu arrow, and then select **Grouping > Ungroup**.

Grouping objects automatically

If you write or draw multiple lines, SMART Meeting Pro software automatically combines the lines

into a single object. For example, if you write the letters of a word, SMART Meeting Pro software combines the individual letters, enabling you to interact with the whole word. If you want to write words on the same line but don't want them combined, leave a large gap between them, use different pens, or briefly put the pen in the pen tray before writing another word (interactive whiteboards only).

If SMART Meeting Pro software combined lines that you want to manipulate individually, select the lines and ungroup them as described above.

Linking objects

You can link objects to websites or files. When you press a linked object, the linked website or file opens.

▶ To link an object

1. Select the object.
2. Press the object's menu arrow, and then select **Link**.

The *Insert Link* dialog box appears.

3. To link the object to a website, type the website's address in the *File path or web address* box.

OR

To link the object to a file, browse to or type the file's location and name in the *File path or web address* box. Select **Copy of file** to attach a copy to your Whiteboard file, or select **Shortcut to file** to insert a shortcut to the file.

4. Press **OK**.

One of the following icons appears in the lower-left corner of the object:

 link to a website

 link to a file

▶ To unlink an object

1. Right-click the object, and then select **Link**.

The *Insert Link* dialog box appears.

2. Press **Remove Link**.
3. Press **OK**.

Creating standalone links

As an alternative to linking existing objects, you can create standalone links.

▶ To create a standalone link

1. Ensure that no objects are selected.
2. Select **Insert > Link**.
The *Insert Link* dialog box appears.
3. To create a link to a website, type the website's address in the *File path or web address* box.

OR

To create a link to a file, browse to or type the file's location and name in the *File path or web address* box. Select **Copy of file** to attach a copy to your Whiteboard file or select **Shortcut to file** to insert a shortcut to the file.

4. Press **OK**.

The link appears as an object on the page. One of the following icons appears in the lower-left corner of the object:

 link to a website

 link to a file

▶ To delete a standalone link

Right-click the object, and then select **Delete**.

Deleting objects

Although you can erase digital ink (see *Erasing digital ink* on page 34), you remove some types of objects, such as text, shapes, lines and images, by deleting them.

NOTE

Locked objects cannot be deleted (see *Locking objects* on page 46). To delete a locked object, unlock it first.

▶ **To delete an object**

1. Select the object.
2. Press the object's menu arrow, and then select **Delete**.

▶ **To delete all objects on a page**

Select **Edit > Clear Page**.

Undoing and redoing changes

You can undo and redo changes you make, just in case you make a mistake or change your mind.

▶ **To undo or redo a change**

Press **Undo**  or **Redo**  on the SMART Business Toolbar.

 **TIPS**

- You can undo several changes by pressing **Undo** repeatedly.
 - You can redo several changes by pressing **Redo** repeatedly.
-

Chapter 6

Working with pages in Whiteboard mode

Creating pages	57
Displaying pages	58
Displaying pages in Full Whiteboard view	59
Displaying pages in Unbound Workspace	60
Panning	60
Zooming	61
Panning while zooming	62
Using radar view	63
Showing and hiding the grid lines	64
Inserting and managing bookmarks	64
Navigating bookmarks	65
Rearranging pages	66
Deleting pages	67

Whiteboard files consist of one or more pages. You can create additional pages, rearrange pages and delete pages. You can also display pages in different views and pan and zoom pages if you're using Unbound Workspace.

Creating pages

You can use the Page Sorter to add pages to your Whiteboard file. You can add a blank page or create a duplicate (or clone) of an existing page.

NOTE

When you create a Whiteboard file in SMART Meeting Pro software room license, the software inserts one page in the file for each display connected to the room computer.

▶ **To add a page**

Press **Insert Page** .

A new page appears after the current page.

 **TIP**

Alternatively, you can add a page by displaying the last page in the file and then pressing **Next Page**  (see *Displaying pages* below).

▶ **To clone a page**

1. Select the thumbnail of the page you want to clone.
2. Press the thumbnail's menu , and then select **Clone Page**.

A duplicate of the page is created.

Displaying pages

You can display any page in a Whiteboard file using the Page Sorter or Organizer. You can display the next or previous page using buttons.

▶ **To display a page using the Page Sorter**

Press the thumbnail of the page you want to display in the Page Sorter.

▶ **To display a page using the Organizer**

1. Press **Organizer**  on the SMART Business Toolbar, and then select the **Pages** tab.
2. Double-click the page's thumbnail.

OR

Drag the page's thumbnail to the appropriate display's thumbnail.

The page appears on the selected display.

 **TIP**

If you press **Identify Screens**, a unique red number appears on each display and its thumbnail so that you can determine the thumbnail for each display.

▶ **To display the next page**

Press **Next Page** .

 **NOTE**

If you press **Next Page**  when viewing the last page in the file, a new, blank page appears (see *Creating pages* on page 57).

▶ **To display the previous page**

Press **Previous Page** .

Displaying pages in Full Whiteboard view

In Full Whiteboard view, SMART Meeting Pro software expands the page to fill the screen by hiding the other user interface elements. You can still access commonly used commands using the minimized SMART Business Toolbar.

 **NOTE**

Depending on how you or the system administrator configured SMART Meeting Pro software, pages might display in Full Whiteboard view by default (see *Changing Whiteboard mode settings* on page 83).

▶ **To display a page in Full Whiteboard view**

1. Press **Full Whiteboard**  in the top-right corner of the page.

The page expands and the buttons shown below appear on the SMART Business Toolbar:

2. Press **Next Page**  or **Previous Page**  to display pages.

▶ **To return to Normal view**

Press **Normal View**  on the SMART Business Toolbar or in the top-right corner of the page.

Displaying pages in Unbound Workspace

Depending on how you or the system administrator configured SMART Meeting Pro software (see *Changing Whiteboard mode settings* on page 83), the software presents pages in one of two styles.

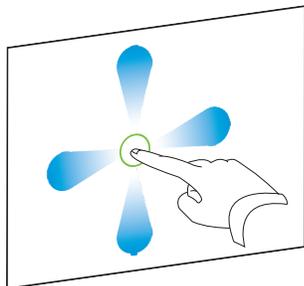

Style	Description	Use
Classic Workspace	Pages have defined boundaries, and the page area is usually the same or slightly larger than the viewable area.	Presenting content and making all the content visible at the same time in the viewable area
Unbound Workspace	Pages have no defined boundaries, and the page area can be significantly larger than the viewable area.	Brainstorming and capturing more notes and drawings on a page than can be displayed in the viewable area at a single time OR Viewing a large, detailed map, diagram or other image and zooming in on specific details

In Unbound Workspace, you can pan and zoom pages and use the radar view, grid lines and bookmarks to navigate pages.

Panning

▶ To pan

1. Press **Pan**  on the SMART Business Toolbar.
2. Press the screen in a blank area of the page.
3. Drag in the direction you want to pan.

Zooming

▶ **To zoom in or out using the Zoom In and Zoom Out buttons**

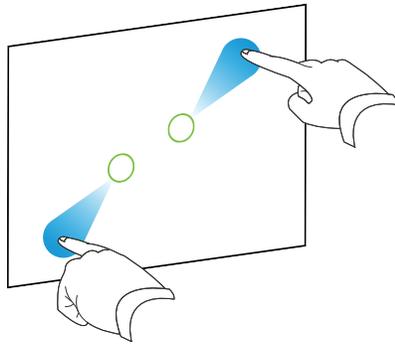

Press **Zoom In**  to zoom in.

OR

Press **Zoom Out**  to zoom out.

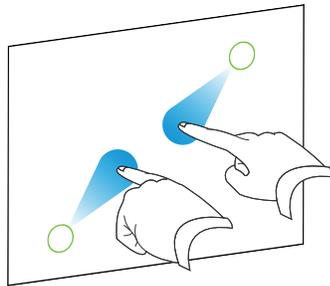

▶ **To zoom in or out using multitouch gestures**

Drag your fingers away from each other to zoom in.

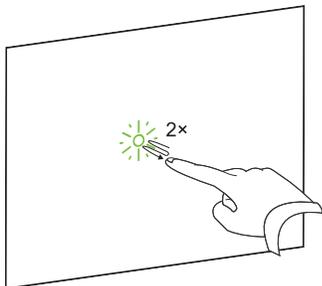

OR

Drag your fingers toward each other to zoom out.

▶ **To return to 100% magnification**

Double-click the whiteboard area.

OR

Press **Zoom to 100%** .

 **TIP**

If the page contains more content than can be displayed at 100% magnification, double-click the whiteboard area again to zoom out until all content is visible.

Panning while zooming

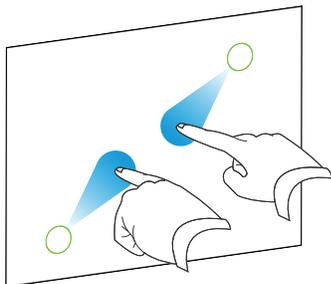

▶ **To pan while zooming**

1. Drag your fingers away from each other to zoom in.

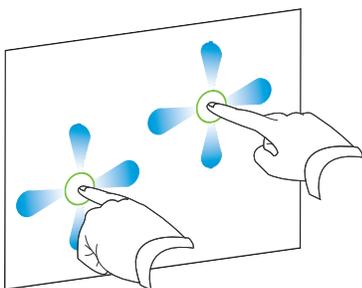

OR

Drag your fingers toward each other to zoom out.

2. Move your fingers left, right, up or down to pan.

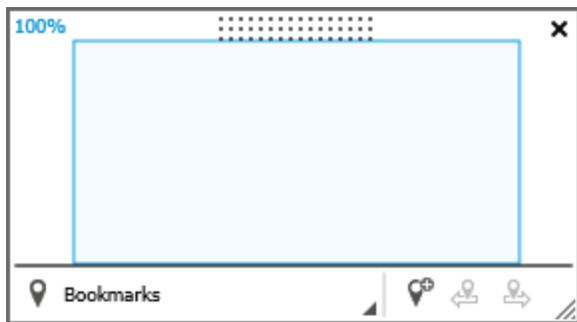

Using radar view

► To show radar view

Press **Show Radar View**  on the SMART Business Toolbar.

Radar view appears.

 **NOTES**

- The blue box indicates the current viewing area. You can change the viewing area by dragging the blue box within radar view.
 - Use the buttons at the bottom of the radar view window to insert and navigate bookmarks.
 - You can move the radar view window by pressing and dragging its top side.
 - You can resize the radar view window by pressing and dragging its bottom-right corner.
-

▶ **To hide radar view**

Press **Close** .

Showing and hiding the grid lines

▶ **To show the grid lines**

Select **View > Grid Lines**.

 **NOTES**

- As you zoom in, the space between the grid lines increases.
 - As you zoom out, the space between the grid lines decreases.
-

▶ **To hide the grid lines**

Clear the selection of **View > Grid Lines**.

Inserting and managing bookmarks

You can insert a bookmark anywhere on a page and at any zoom level.

After inserting a bookmark, you can do the following:

- Rename the bookmark to represent the content the bookmark marks (for example, “Executive Summary,” “Initial Brainstorming” or “Northwest Entry”)
- Change the order of the bookmarks on a page
- Delete a bookmark if it’s no longer needed

▶ **To insert a bookmark**

1. If radar view isn't visible, press **Show Radar View**  on the SMART Business Toolbar.
2. Pan and zoom to the location where you want to insert the bookmark.
3. Press **Add Bookmark** .

▶ **To rename a bookmark**

1. If radar view isn't visible, press **Show Radar View**  on the SMART Business Toolbar.
2. If the bookmark menu isn't visible, press **Bookmarks** .
3. Select the bookmark you want to rename.
4. Press the bookmark's name.
5. Type a new name for the bookmark, and then press ENTER.

 **NOTE**

If you don't want to rename the bookmark, press **Cancel**  instead of pressing ENTER.

▶ **To change the order of bookmarks**

1. If radar view isn't visible, press **Show Radar View**  on the SMART Business Toolbar.
2. If the bookmark menu isn't visible, press **Bookmarks** .
3. Drag a bookmark's row up or down to change the bookmark's order.

▶ **To delete a bookmark**

1. If radar view isn't visible, press **Show Radar View**  on the SMART Business Toolbar.
2. If the bookmark menu isn't visible, press **Bookmarks** .
3. Press the bookmark's **Delete Bookmark**  button.

Navigating bookmarks

You can navigate bookmarks two ways:

- Use the Next Bookmark and Previous Bookmark buttons in situations where you want to navigate the bookmarks sequentially, such as presentations.

- Use the bookmark menu in situations where you want to navigate the bookmarks non-sequentially, such as brainstorming sessions.

▶ **To navigate bookmarks using the Next Bookmark and Previous Bookmark buttons**

Navigate to the next bookmark by pressing **Next Bookmark** .

OR

Navigate to the previous bookmark by pressing **Previous Bookmark** .

 **NOTE**

If you navigate to a bookmark, pan or zoom, and then press **Next Bookmark**  or **Previous Bookmark** , SMART Meeting Pro software navigates to the bookmark. You can then press **Next Bookmark**  or **Previous Bookmark**  to navigate to the next or previous bookmark.

▶ **To navigate bookmarks using the bookmark menu**

1. If radar view isn't visible, press **Show Radar View**  on the SMART Business Toolbar.
2. If the bookmark menu isn't visible, press **Bookmarks** .

 **NOTE**

The bookmark menu contains a row for each bookmark on the page. The row displays the bookmark's name and a thumbnail image showing the page contents marked by the bookmark.

3. Navigate to a bookmark by pressing its thumbnail image.

Rearranging pages

If you want, you can rearrange the order of the pages in a file.

▶ **To rearrange pages using the Page Sorter**

1. Press the thumbnail of the page you want to move in the file.
A blue border appears around the thumbnail.

2. Drag the thumbnail to its new position in the Page Sorter.
A blue line indicates the page's new position.
3. Release the thumbnail.

▶ **To rearrange pages using the Organizer**

1. Press **Organizer**  on the SMART Business Toolbar, and then select the **Pages** tab.
2. Press the thumbnail of the page you want to move in the file.
A blue border appears around the thumbnail.
3. Drag the thumbnail to its new position in the *Pages* tab.
A blue line indicates the page's new position.
4. Release the thumbnail.

Deleting pages

You can delete a page from the current file using the Page Sorter.

▶ **To delete a page**

1. Select the thumbnail of the page you want to delete.
2. Press the thumbnail's menu , and then select **Delete Page**.

 **TIPS**

- If you are using the classic Whiteboard style, you can also delete pages by pressing **Delete Page**  in the Page Sorter.
 - As an alternative to deleting a page, you can clear all of its objects (see *Deleting objects* on page 54).
-

Chapter 7

Working with files in Whiteboard mode

Creating and opening files	69
Saving files	70
Printing files	72
Emailing files	72

In SMART Meeting Pro software, you can create or open files. After creating or opening a file, you can save it, print it or email it to others.

Creating and opening files

When you start SMART Meeting Pro software, a new blank Whiteboard file opens automatically. You can also create or open another Whiteboard file any time you like.

NOTES

- SMART Meeting Pro software creates new files in the .fcw format, but you can save the files in various formats (see *Saving files* on the next page).
 - In addition to opening .fcw and .notebook files, you can insert PowerPoint and PDF files in SMART Meeting Pro software (see *Inserting PowerPoint presentations* on page 39 and *Inserting PDF files* on page 40).
-

To create a new Whiteboard file

1. Select **File > New**.

If you were already working on a file, you're prompted to save it.

2. Press **Yes** and follow the on-screen instructions to save your file.

OR

Press **No** to close your file without saving it.

A new untitled Whiteboard file opens.

To open an existing Whiteboard file

1. Select **File > Open**.

The *Open* dialog box appears.

2. Browse to and select the file you want to open.
3. Press **Open**.

Saving files

Depending on how you or the system administrator configured SMART Meeting Pro software (see *Changing Whiteboard mode settings* on page 83), the software saves files in one of the following formats by default:

- .fcw
- .notebook
- .pdf
- .ppt
- .pptx

However, you can choose to save your files in any of the above formats as well as in image formats (.jpg, .bmp, .png and .gif).

NOTES

- SMART Meeting Pro 4.0 and later software and SMART Meeting Pro PE software can open .fcw files.
 - If you are using SMART Meeting Pro software in Unbound Workspace and save your file in .pdf, .ppt, or .pptx format, the software scales the contents of Whiteboard pages to fit within the boundaries of PDF pages or PowerPoint slides.
 - You can save files in .notebook format only if you are using SMART Meeting Pro software in Classic Workspace.
-

▶ **To save a new file**

1. Select **File > Save As**.

The *Save As* dialog box appears.

2. Browse to the folder where you want to save the file.
3. Type a name for the file in the *File name* box.
4. Select the format for the file from the *Save as type* list.
5. Press **Save**.

If you save the file in a format other than .fcw or .notebook, a dialog box appears informing you that you may lose some features of your file, or that you won't be able to open the file in a future session. Click **Yes** to confirm the action.

▶ **To save an existing file**

Select **File > Save**.

If you try to save a file that was originally created in PowerPoint, a dialog box appears and warns you about overwriting the original file. If you save the file with the same file name, you could lose some of the features of the original file.

▶ **To save an existing file with a new name or location**

1. Select **File > Save As**.

The *Save As* dialog box appears.

2. Browse to the folder where you want to save the file.
3. Type a name for the file in the *File name* box.
4. Select the format for the file from the *Save as type* list.
5. Press **Save**.

If you save the file in a format other than .fcw or .notebook, a dialog box appears informing you that you may lose some features of your file, or that you won't be able to open the file in a future session. Click **Yes** to confirm the action.

Printing files

You can print pages from your Whiteboard file just as you would from any standard Windows program. In addition, you can print the file “handout” style, with multiple page thumbnails on a single sheet of paper.

▶ To print a file

1. Select **File > Print**.

The *Print* dialog box appears.

2. In the *Print What* area, select **Thumbnails**, **Handouts** or **Full Page** print.
3. Press the **Page Layout** tab.
4. Select the page or the page range you want to print, and any other options you'd like.

 **NOTE**

The default page range is *All* pages.

5. Press the **Printer Setup** tab.
6. Select the printer and set its properties, and then select any other options you'd like.
7. Press **Print**.

Emailing files

If you're using a room license, you can email Whiteboard files directly from SMART Meeting Pro software as .fcw, PDF or PowerPoint files.

 **NOTE**

To use the email feature, you must have Microsoft Exchange integration enabled or your computer's default email client configured. Please see the system administrator to confirm availability of these features.

▶ To email a Whiteboard file (Microsoft Exchange integration enabled)

1. Select **File > Send To > Mail Recipient (as Attachment)**.

The *E-mail Notes* window appears.

2. Select the Whiteboard file formats you want to attach to your email in the *E-mail the following file(s)* area.

 **NOTE**

You can attach the Whiteboard file in .fcw, .pdf and .ppt formats. Consider which software the email recipients are most likely to have.

3. Optionally, press **Add Attachments** to attach additional files to your email.
4. Type the recipients' email addresses in the *Enter e-mail addresses* box.
5. Press **Send E-mail** to email your meeting notes.

▶ **To email a whiteboard file (email client configured)**

1. Select **File > Send To > Mail Recipient (as Attachment)**.
A dialog box appears.
2. Type a name for the Whiteboard file in the *File name* box.
3. Select a file format from the *File type* drop-down list.

 **NOTE**

You can attach the Whiteboard file in .fcw, .pdf, .ppt and .pptx formats. Consider which software the email recipients are most likely to have.

4. Press **OK**.
An email form is automatically generated.
5. Complete the email form, and then press **Send**.

Chapter 8

Sharing content using the Business Gallery

Finding and using content in the Business Gallery	75
Using stock content	76
Adding your own content to the Business Gallery	77
Creating folders	77
Adding your content to folders	78
Exporting your content	79

The Business Gallery contains a wide variety of content that you can add to your Whiteboard files. This content includes templates for brainstorming, planning and other meeting activities as well as stock shapes and icons. You can browse content in the Business Gallery or search for content by keywords.

You can also contribute your own content to the Business Gallery. This makes SMART Meeting Pro software a simple but effective way to share content with others in your organization.

Finding and using content in the Business Gallery

The Business Gallery contains items organized into folders. Select a folder to view thumbnail images of its items.

You can search for an item in the Business Gallery using the keyword search.

After browsing or searching for an item, you can add it to a Whiteboard page.

▶ **To browse the Business Gallery**

1. If the Business Gallery isn't visible, press **Gallery**  on the SMART Business Toolbar.
2. Select a folder to display its contents.

 **TIP**

You can also expand or collapse a folder by pressing its  or  buttons.

▶ **To search the Business Gallery**

1. If the Business Gallery isn't visible, press **Gallery**  on the SMART Business Toolbar.
2. Type a keyword in the search box, and then press **Search** .

The Business Gallery displays all content that contains the keyword.

▶ **To add an item to a Whiteboard page**

1. If the Business Gallery isn't visible, press **Gallery**  on the SMART Business Toolbar.
2. Browse or search for the item.
3. Drag the item's thumbnail to the Whiteboard page.

▶ **To close the Business Gallery**

Press **Gallery**  on the SMART Business Toolbar.

Using stock content

The Business Gallery contains an extensive collection of stock content, including templates for brainstorming, decision making and meeting management and shapes and icons for flow charts and notes. You can show this stock content while your organization develops its own content. After your organization has developed its own content, you can hide the stock content.

 **TIP**

You or your system administrator can hide the stock content by default (see *Changing Business Gallery settings* on page 88).

▶ **To show stock content**

1. If the Business Gallery isn't visible, press **Gallery**  on the SMART Business Toolbar.
2. Press **Gallery** ▼, and then select **Show Stock Content**.

▶ **To hide stock content**

1. If the Business Gallery isn't visible, press **Gallery**  on the SMART Business Toolbar.
2. Press **Gallery** ▼, and then clear the selection of **Show Stock Content**.

Adding your own content to the Business Gallery

You can create folders in the Business Gallery and add your own content to them.

Creating folders

Before you add your own content to the Business Gallery, you first create folders to place the content in. The folders can reflect your organization's business structure, workflows or other logical groupings of its content. After creating an initial set of folders, you can rename and delete individual folders as needed.

 **NOTE**

By default, the folders you create are saved in a location on the room computer that is available to anyone who logs into the room computer. However, you or the system administrator can change the default location. You or the system administrator can also create additional locations and secure these locations so that only specified users can view, add, change and delete the content in them. For example, you could create a network location for accounting content and secure it so that only users in the accounting department can view, add, change and delete that content. For more information, see *Changing Business Gallery settings* on page 88.

▶ **To create a folder**

1. If the Business Gallery isn't visible, press **Gallery**  on the SMART Business Toolbar.
2. Press **Gallery** ▼, and then select **Add Custom Folder**.

The *Add Custom Folder* dialog box appears.

3. Type a name for the folder in the *Type a name for the new folder* box, and then press **OK**.
The folder appears in the Business Gallery.

▶ **To rename a folder**

1. If the Business Gallery isn't visible, press **Gallery**  on the SMART Business Toolbar.
2. Select the folder you want to rename.
3. Press **Gallery** ▾, and then select **Rename Current Folder**.

The *Rename Current Folder* dialog box appears.

4. Type a new name for the folder in the *Type a new name for the folder* box, and then press **OK**.

The folder's name changes in the Business Gallery.

▶ **To delete a folder and its contents**

1. If the Business Gallery isn't visible, press **Gallery**  on the SMART Business Toolbar.
2. Select the folder you want to delete.
3. Press **Gallery** ▾, and then select **Delete Current Folder**.

The *Delete Custom Folder* dialog box appears.

4. Press **Yes**.

The folder disappears from the Business Gallery.

Adding your content to folders

After you have created folders, you can add items to them. Any object that you can create in Whiteboard mode can become an item in a folder, including the following:

- Linked objects (see *Linking objects* on page 53)
- Grouped objects (see *Grouping objects* on page 52)
- Images (see *Inserting images* on page 39)
- Shapes (see *Creating shapes and lines* on page 35)

After you have added an item, you can change its name and keywords to make it more searchable or delete it from the Business Gallery if it's no longer needed.

▶ **To add an item to a folder**

1. If the Business Gallery isn't visible, press **Gallery**  on the SMART Business Toolbar.
2. Select the object that you want to add as an item.

3. Drag the object from the page to the folder.

SMART Meeting Pro software adds the object to the folder as an item.

 **NOTES**

- You can add items only to custom folders that you or other users have created. Stock content folders won't accept new items.
 - A locked object cannot be added as an item to a folder (see *Locking objects* on page 46).
-

▶ **To change an item's name and keywords**

1. If the Business Gallery isn't visible, press **Gallery**  on the SMART Business Toolbar.
2. Select the folder containing the item.
3. Select the item, press its menu arrow , and then select **Properties**.

The *Gallery Item Properties* dialog box appears.

4. Type a name for the item in the *Name* box.
5. Type keywords for the item in the *Keywords* box.
6. Press **OK**.

▶ **To delete an item**

1. If the Business Gallery isn't visible, press **Gallery**  on the SMART Business Toolbar.
2. Select the folder containing the item.
3. Select the item, press its menu arrow , and then select **Delete**.
4. Press **OK**.

Exporting your content

After you have created your folders and added content to them, you can export your content. This is useful when you have set up content on one room computer and want to transfer it to another room computer.

▶ **To export your content**

1. If the Business Gallery isn't visible, press **Gallery**  on the SMART Business Toolbar.

2. Press **Gallery** ▼, and then select **Export Custom Content**.

The *Export Custom Content* dialog box appears.

3. Select the check boxes of the folders you want to export, and then press **Next**.

4. Type a name for the exported content folder in the *Name* box.

5. Press **Browse**, browse to the location where you want to save the exported content folder, and then press **OK**.

6. Press **Export**.

Chapter 9

Maintaining SMART Meeting Pro software

Configuring SMART Meeting Pro software	81
Accessing SMART Meeting Pro Settings	82
Changing general settings	82
Changing Whiteboard mode settings	83
Changing Bridgit software integration settings	85
Changing email settings	87
Changing Business Gallery settings	88
Changing Microsoft Exchange integration settings	89
Customizing the Programs button menu	92
Troubleshooting SMART Meeting Pro software	95
Troubleshooting Microsoft Exchange integration	95
Troubleshooting Bridgit software integration	95

This chapter explains how to configure and troubleshoot SMART Meeting Pro software.

Configuring SMART Meeting Pro software

You can use the *SMART Meeting Pro Settings* dialog box to change various administrator settings:

- General settings
- Whiteboard mode settings
- Bridgit software integration settings
- Email settings
- Business Gallery settings
- Microsoft Exchange integration settings

→ IMPORTANT

You must have administrator rights to access the *SMART Meeting Pro Settings* dialog box.

Accessing SMART Meeting Pro Settings

You can use the *SMART Meeting Pro Settings* dialog box to change various administrator settings. You can also change your administrator password.

▶ To access the SMART Meeting Pro Settings dialog box

1. Press the **SMART Board** icon  in the notification area, and then select **SMART Settings**.
2. Press **SMART Meeting Pro Settings**.

The *SMART Meeting Pro Settings* log on dialog box appears.

3. Type your administrator password, and then press **OK**.

NOTE

There is no password by default.

The *SMART Meeting Pro Settings* dialog box appears.

▶ To change the administrator password

1. Press the **SMART Board** icon  in the notification area, and then select **SMART Settings**.
2. Press **SMART Meeting Pro Settings**.

The *SMART Meeting Pro Settings* log on dialog box appears.

3. Press **Change Password**.

The *Change administrator password* dialog box appears.

4. Type your current password and new password in the appropriate text boxes.
5. Press **OK**.

Changing general settings

You can change general settings for SMART Meeting Pro software, including the following:

- Mode displayed when the software starts
- Whether meeting notes are emailed¹
- Whether the operating system logs off by default when users end meetings²

¹Room license only

²Room license only

▶ **To change general settings**

1. Open the *SMART Meeting Pro Settings* dialog box (see *Accessing SMART Meeting Pro Settings* on the previous page).
2. Press the **SMART Meeting Pro** tab.
3. Optionally, press **Hardware Settings** to access SMART Settings and change the interactive product's default behavior and settings.
4. Change settings:

Control	Procedure	Notes
Default mode	Select Desktop to display Desktop mode when SMART Meeting Pro PE software starts. OR Select Whiteboard to display Whiteboard mode when SMART Meeting Pro PE software starts.	N/A
In exit dialog box, select "E-mail" option	Select the check box to attach meeting notes to an email by default when users end a meeting.	This control is not applicable to personal licenses.
In exit dialog box, select "Log off" option	Select the check box to log off by default when users end a meeting.	This control is not applicable to personal licenses.

5. Press **OK**.

Changing Whiteboard mode settings

You can change the default style, layout, ink and saved file format used in Whiteboard mode. You can also change how often Whiteboard files are saved automatically or you can disable the auto-save and recovery feature.

▶ **To change Whiteboard mode settings**

1. Open the *SMART Meeting Pro Settings* dialog box (see *Accessing SMART Meeting Pro Settings* on the previous page).

2. Press the **Whiteboard** tab.
3. Change settings:

Control	Procedure	Notes
Default whiteboard style	Select Unbound Whiteboard to present pages in Unbound Workspace. OR Select Classic Whiteboard to present pages in Classic Workspace.	In Unbound Workspace, pages have no defined boundaries, and the page area can be significantly larger than the viewable area. This is beneficial when users want to use Whiteboard mode for brainstorming or to zoom in on specific details in large, detailed maps, diagrams or other images. In Classic Workspace, pages have defined boundaries, and the page area is usually the same as or slightly larger than the viewable area. This is beneficial when users want all content to be visible at the same time in the viewable area. SMART recommends that you select Unbound Workspace.
Default whiteboard layout	Select Normal to display Whiteboard pages in Normal view by default. OR Select Full Whiteboard to display Whiteboard pages in Full Whiteboard view by default.	In Normal view, the page, menu, Page Sorter and full SMART Business Toolbar are visible. All the features of Whiteboard mode are accessible. In Full Whiteboard view, only the page and a minimized SMART Business Toolbar are visible. This provides more Whiteboard area for brainstorming and presenting.
Default file save format	Select the default format for Whiteboard files.	The .notebook format is available only if you select Classic Whiteboard in the <i>Default whiteboard style</i> drop-down list.
Ink type	Select Calligraphic to smooth digital ink automatically as users write or draw. OR Select Regular to not smooth digital ink automatically.	N/A

Control	Procedure	Notes
Enable automatic recovery	Select the check box to enable automatic saving of Whiteboard files, and then type the interval in minutes between saves in the text box. OR Clear the check box to disable automatic saving of Whiteboard files.	If you disable automatic saving, users' Whiteboard files will not be automatically saved and recovered if the software stops running unexpectedly.

4. Press **OK**.

Changing Bridgit software integration settings

If Bridgit software integration is enabled, you can automatically share the primary display, hide the meeting password and change privacy and audio settings. You can also configure or change Bridgit server settings.

▶ To change Bridgit software integration settings

1. Open the *SMART Meeting Pro Settings* dialog box (see *Accessing SMART Meeting Pro Settings* on page 82).
2. Press the **Bridgit** tab.
3. Change settings:

Control	Procedure	Notes
Automatically share primary screen	Select the check box to share the primary display by default. OR Clear the check box to not share the primary display by default.	N/A

Control	Procedure	Notes
Show meeting password on collaboration bar	<p>Select the check box to display the meeting password on the Bridgit Collaboration Bar.</p> <p>OR</p> <p>Clear the check box to display the meeting password as a string of asterisks (*) on the Bridgit Collaboration Bar.</p> 	This procedure hides the meeting password on only the local meeting room Bridgit Collaboration Bar.
Bridgit Server address	Type the address of your Bridgit server.	<p>If you correctly enter the Bridgit server address, an Accept  icon appears beside the text box. A Reject  icon appears if you enter the information incorrectly or if you're disconnected from the network.</p>
Access password	Type the optional access password for your Bridgit server.	<p>Meeting participants are prompted for the access password when they join a Bridgit meeting.</p> <p>If you correctly enter the access password, an Accept  icon appears beside the text box. A Reject  icon appears if you enter the information incorrectly or if you're disconnected from the network.</p>
Creation password	Type the creation password for your Bridgit server.	<p>Meeting owners are prompted for the creation password when they create a Bridgit meeting.</p> <p>If you correctly enter the creation password, an Accept  icon appears beside the text box. A Reject  icon appears if you enter the information incorrectly or if you're disconnected from the network.</p>

Control	Procedure	Notes
Room or meeting name	Type the room or meeting name you want to appear on the Bridgit Collaboration Bar.	If you enter an available name, an Accept  icon appears beside the text box. A Reject  icon appears if you enter an unavailable name or if you're disconnected from the network.

4. Optionally, press **More Privacy Settings** to change Bridgit software meeting settings (see *Changing meeting settings* on page 110).
5. Optionally, press **Audio Settings** to change Bridgit software audio settings (see *Changing audio settings* on page 111).
6. Press **OK**.

Changing email settings

If you don't enable Microsoft Exchange integration (see *Changing Microsoft Exchange integration settings* on page 89), you can use SMTP email or the computer's default email client instead.

NOTE

If you don't enable Microsoft Exchange integration, you're unable to use the meeting notification features of SMART Meeting Pro software. However, you can use SMTP email to send your meeting notes from Whiteboard mode.

To change email settings

1. Open the *SMART Meeting Pro Settings* dialog box (see *Accessing SMART Meeting Pro Settings* on page 82).
2. Press the **E-mail** tab.

3. If you want to use SMTP email, change settings:

Control	Procedure	Notes
E-mail address	Type the sender email address.	The email address you enter will appear in the <i>From</i> field for any outgoing emails. If the computer doesn't have an email client installed, don't change the <i>do not reply</i> default value. This indicates to mail recipients that they can't reply to emails they receive.
SMTP server name	Type your SMTP server location.	N/A

OR

If you want to use the computer's default email client, select the **Use system e-mail** check box.

→ **IMPORTANT**

If you enable Microsoft Exchange integration, you're unable to use the computer's default email client with SMART Meeting Pro software even if you select the **Use system e-mail** check box.

4. Press **OK**.

▶ **To restore default email settings**

1. Open the *SMART Meeting Pro Settings* dialog box (see *Accessing SMART Meeting Pro Settings* on page 82).
2. Press the **E-mail** tab.
3. Press **Restore Defaults**.
4. Press **OK**.

Changing Business Gallery settings

You can specify whether stock Business Gallery content is shown or hidden and change the default folder where added content is stored. You can also add additional content folders.

▶ **To change Business Gallery settings**

1. Open the *SMART Meeting Pro Settings* dialog box (see *Accessing SMART Meeting Pro Settings* on page 82).

2. Press the **Gallery** tab.
3. Change settings:

Control	Procedure	Notes
Show Stock Content	Select the check box to show stock content. OR Clear the check box to hide stock content.	The Business Gallery contains an extensive collection of stock content, including templates for brainstorming, decision making and meeting management and shapes and icons for flow charts and notes. You can show this stock content while your organization develops its own content. After your organization has developed its own content, you can hide the stock content.
Save Gallery content added by the user in	Type the path to the folder where you want content added by users to be saved.	N/A
Additional gallery folders	To add a new content folder, press Add and then browse to and select the folder. To change an existing folder, select it, press Edit , and then browse to and select a new folder. to remove an existing folder, select it, press Delete , and then press Yes when prompted.	To view the contents of an added folder, users must have permission to view the folder. Select a folder and click Properties to view its permissions and other properties.

4. Press **OK**.

Changing Microsoft Exchange integration settings

You can enable Microsoft Exchange integration, change a variety of automatic settings and configure a service account.

▶ To change integration settings for an on-premise Microsoft Exchange server

1. Open the *SMART Meeting Pro Settings* dialog box (see *Accessing SMART Meeting Pro Settings* on page 82).
2. Press the **Microsoft Exchange** tab.
3. Select the **Enable Microsoft Exchange integration** check box.

4. Change settings:

Control	Procedure	Notes
Room e-mail address	Type your meeting room email address.	N/A
Auto start scheduled meeting at logon	Select the check box to enable automatic starting of scheduled meetings.	N/A
Auto book ad hoc meeting at logon	Select the check box to enable automatic creation of ad hoc meetings.	N/A
Auto reset room after meeting end time	Select the check box to enable the automatic end-meeting feature, and then select the delay time before the meeting automatically ends (in minutes) from the drop-down list.	N/A
Auto insert agenda at meeting start	Select the check box to automatically insert your meeting details.	N/A
Use service account instead of logged on user's credentials	Select the check box to use a service account, and then type your domain, user name and password in the appropriate boxes.	Service accounts require special configuration by the system administrator. By default, you should not use the service account options or enter your domain information. If the service account is not configured correctly, SMART Meeting Pro software may not function as expected. Contact the system administrator for further details.

5. Press **OK**.

► **To change integration settings for an Office 365-hosted Microsoft Exchange server**

1. Open the *SMART Meeting Pro Settings* dialog box (see *Accessing SMART Meeting Pro Settings* on page 82).
2. Press the **Microsoft Exchange** tab.
3. Select the **Enable Microsoft Exchange integration** check box.

4. Change settings:

Control	Procedure
Room e-mail address	Type your meeting room email address.
Auto start scheduled meeting at logon	Select the check box to enable automatic starting of scheduled meetings.
Auto book ad hoc meeting at logon	Select the check box to enable automatic creation of ad hoc meetings.
Auto reset room after meeting end time	Select the check box to enable the automatic end-meeting feature, and then select the delay time before the meeting automatically ends (in minutes) from the drop-down list.
Auto insert agenda at meeting start	Select the check box to automatically insert your meeting details.

5. Press **Server Settings**.

The *SMART Meeting Pro Settings* dialog box appears.

- In the *Microsoft Exchange Server* section, select **Manually specify server**, and then type **https://outlook.office365.com/ews/exchange.asmx** in the *Server URL* box.
- In the *Active Directory server* section, select **Automatically detect server**.
- Press **OK**.
- Press **OK**.
- Restart SMART Meeting Pro software.
- Enter your Office 365 credentials when prompted.

 **NOTES**

- Enter the user name in the form of an email address.
 - Confirm with your Office 365 administrator the correct form of the email address. For example, John Smith's email address might be `jsmith@example.com` or `john.smith@example.com` depending on how his organization has set up his Office 365 credentials.
-

Customizing the Programs button menu

You can use the *Menu Customization* window to add, edit and remove custom shortcut links to applications, files, folders and websites to the Programs button menu (see *Using the Programs button* on page 30). You can also add a separator between shortcuts, change the order of shortcuts and restore the Programs button menu to default settings.

 **NOTE**

The default shortcuts cannot be modified.

▶ **To access the Menu Customization window**

In Windows 7 operating system, select **Start > All Programs > SMART Technologies > SMART Tools > Meeting Pro Program Menu Customization**.

OR

In Windows 8.1 operating system, go to the *Apps* screen and then scroll to and select **SMART Technologies > Meeting Pro Program Menu Customization**.

OR

In Windows 10 operating system, press **Start**, and then scroll to and select **SMART Technologies > Meeting Pro Program Menu Customization**.

▶ **To add a shortcut**

1. Access the *Menu Customization* window, and then press **Add**

The *Add a Shortcut* dialog box appears.

2. Select the shortcut type in the *Shortcut type* drop-down list.
3. Type a name for the shortcut in the *Name* box.
4. Press **Browse**, browse to and select the application file, document file or folder you want to link to, and then press **Open**.
5. Press **OK**.

The shortcut becomes available in the Programs button menu the next time you start SMART Meeting Pro software.

► **To modify a shortcut's default icon**

1. Access the *Menu Customization* window.
2. Select the shortcut link in the *Programs* list, and then press **Edit**.

 **NOTE**

The default icon for folders, websites and the default shortcuts cannot be modified.

The *Edit Shortcut* dialog box appears.

3. Clear the **Use the default icon** check box.
4. Press **Browse**, browse to and select the image file you want to use, and then press **Open**.

 **NOTE**

You can use .ico, .jpeg, .png and .gif image file types.

5. Press **OK**.

The new icon appears in the Programs button menu the next time you start SMART Meeting Pro software.

► **To modify a shortcut's location**

1. Access the *Menu Customization* window.
2. Select the shortcut in the *Programs* list, and then press **Edit**.

 **NOTE**

The default shortcuts cannot be edited.

The *Edit Shortcut* window opens.

3. Update the path to the application file, document file, folder or website.
4. Press **OK**.

The shortcut will point to the new path in the Programs button menu the next time you start SMART Meeting Pro software.

▶ **To modify a shortcut's name**

1. Access the *Menu Customization* window.
2. Select the shortcut in the *Programs* section, and then press **Edit**.

The default shortcuts cannot be edited.

3. Enter a new name for the shortcut in the appropriate field.
4. Press **OK**.

The new name appears in the Programs button menu the next time you start SMART Meeting Pro software.

▶ **To add a separator**

1. Access the *Menu Customization* window, and then press **Add**.

The *Add a Shortcut* dialog box appears.

2. Select **Separator** in the *Shortcut type* drop-down list.
3. Press **OK**.

A new separator appears at the end of the *Programs* list.

4. Press **Move Up** and **Move Down** to position the separator where you want it to appear.

The new separator appears in the Programs button menu the next time you start SMART Meeting Pro software.

▶ **To restore default settings**

Access the *Menu Customization* window, and then press **Restore Defaults**.

The Program button menu is restored to factory default setting. All custom shortcuts are lost.

Troubleshooting SMART Meeting Pro software

Troubleshooting Microsoft Exchange integration

Use the following table to troubleshoot issues with Microsoft Exchange integration:

Issue	Cause	Recommendation
A warning icon appears on the <i>Meeting</i> button.	SMART Meeting Pro software isn't connecting with Microsoft Exchange server.	Contact the system administrator for assistance.

Troubleshooting Bridgit software integration

Use the following table to troubleshoot issues with Bridgit software integration:

Issue	Cause	Recommendation
The Bridgit Collaboration Bar and the View Screens mode button don't appear.	A Bridgit server address wasn't provided when SMART Meeting Pro software was installed.	Contact the system administrator or see <i>Changing Bridgit software integration settings</i> on page 85 for more information.
An <i>Unable to Connect</i> message appears on the Bridgit Collaboration Bar.	The Bridgit server is unavailable or an incorrect Bridgit server address was used to configure SMART Meeting Pro software.	Contact the system administrator or see <i>Changing Bridgit software integration settings</i> on page 85 for more information.
An <i>Attempting to reconnect</i> message appears on the Bridgit Collaboration Bar.	The network connection is lost or interrupted. SMART Meeting Pro software attempts to connect to the conference for the next three minutes.	If the message persists, contact the system administrator.

Appendix A

Connecting with others using Bridgit software integration

About Bridgit meeting roles	98
Scheduling Bridgit meetings	99
Navigating Bridgit software integration	99
Managing a Bridgit meeting	100
Setting up audio in a Bridgit meeting	101
Sharing your desktop in a Bridgit meeting	103
Interacting with a shared desktop during a Bridgit meeting	103
Viewing and chatting with participants in a Bridgit meeting	104
Sharing and viewing webcams in a Bridgit meeting	106
Joining another Bridgit meeting	107
Joining Bridgit meetings remotely	109
Maintaining Bridgit software	110
Changing meeting settings	110
Changing audio settings	111

You can install Bridgit software and integrate it with SMART Meeting Pro software room license. You can use the Bridgit Collaboration Bar to create a meeting, invite meeting participants, share your screen and join meetings created by others. You can also chat with meeting participants.

NOTES

- Integration with Bridgit software collaboration features requires a Bridgit server. Contact the system administrator to confirm availability.
- The Bridgit Collaboration Bar and the View Screens mode button don't appear if a Bridgit server address wasn't provided when SMART Meeting Pro software was installed. Contact the system administrator or see *Changing Bridgit software integration settings* on page 85 for more information.

About Bridgit meeting roles

When you create a Bridgit meeting, you become the meeting's owner and can define many of the characteristics of the meeting. When you attend a meeting, you can be a presenter or a participant. The presenter is the person whose desktop is currently shared. A participant can see and draw on the shared desktop, hear and talk in a meeting and view webcams only if the owner or presenter enabled these features.

NOTE

The meeting's owner and presenter are indicated in the participant list. Both owners and participants can act as the presenter.

Owner The meeting's owner is the person who created the meeting on the Bridgit server. The owner can do the following:

- Adjust the meeting settings
- Adjust audio optimization
- Take over desktop sharing
- Draw on the desktop, talk in a meeting and share webcams, even if the presenter disabled these features for other participants
- Disconnect all users and end the meeting

Presenter The presenter is the person whose desktop is currently shared. The presenter can do the following:

- Adjust the meeting settings
- Draw on the desktop
- Talk in a meeting
- Share webcams

Although the presenter can disable these features for other participants, the features are always available to the meeting's owner.

Participant The participants in a meeting can always do the following:

- See the shared desktop
- Listen to other participants talk
- View shared webcams

Participants can draw on the desktop, talk in a meeting or share a webcam only when the owner or presenter has enabled these features.

Scheduling Bridgit meetings

Bridgit software users can also use the SMART Scheduler Outlook add-in to schedule their Bridgit meetings in advance. SMART Meeting Pro software from each meeting room automatically connects to the scheduled meeting. See your Bridgit software online Help for more information on installing and using the SMART Scheduler Outlook add-in.

NOTES

- This feature requires Microsoft Exchange integration.
- This feature is not supported by Office 365-hosted Microsoft Exchange servers.

To access online Help for Bridgit software

1. Double-click the **Bridgit** icon  on your desktop.

The *SMART Bridgit Software* window opens.

2. Press **Help**.

Navigating Bridgit software integration

The Bridgit Collaboration Bar runs across the top of the screen and contains all of the information and tools you need to host, join and control your meetings. If you enabled Bridgit software integration, a Bridgit meeting and password are automatically created when SMART Meeting Pro software starts. You see the following components on the Bridgit Collaboration Bar.

Icon	Description	Action
	Meeting name	Displays the meeting name.
	Meeting password	Displays the meeting password.
	Participant Counter	<ul style="list-style-type: none">• Displays the number of participants joined to the current meeting.• Enables you to send email meeting invitations and to broadcast chat messages to meeting participants.
	Microphone	Turns the microphone on and off.

Icon	Description	Action
	Webcam	Opens the Video window.
		 NOTE The Webcam icon appears only if your Bridgit Server and Bridgit software support video.
	Share Screen/Stop Sharing	Shares or stops sharing your desktop with meeting participants.
	Bridgit collaboration menu	Displays various Bridgit software meeting options.
	Positioning handle	Enables you to move the Bridgit Collaboration Bar.

 **NOTE**

The Bridgit Collaboration Bar and the View Screens mode button don't appear if a Bridgit server address wasn't provided when SMART Meeting Pro software was installed. Contact the system administrator or see *Changing Bridgit software integration settings* on page 85 for more information.

Managing a Bridgit meeting

After a Bridgit meeting starts, you can manage it by doing the following:

- Send an invitation to remote participants
- Change the meeting name and password
- Hide the meeting password

 **To send an invitation to remote participants**

1. Press **Menu** on the Bridgit Collaboration Bar, and then select **E-mail Invitation to Others**.
The *Send E-mail Invitation* dialog box appears, showing the server name, meeting name, password and instructions on how to join the meeting.
2. Enter the participants' email addresses in the *To* box, and then press **Send**.

▶ To change the meeting name and password

1. Press **Menu** on the Bridgit Collaboration Bar, and then select **Change Meeting Name and Password**.

The *Change Meeting Name and Password* dialog box appears.

2. Type a new name and password in the text boxes.
3. Optionally, select **Do you want to remove current attendees from the meeting?** if you want to disconnect all attendees from the meeting.

NOTE

This option isn't available if the meeting was scheduled.

4. Press **OK**.

▶ To hide the meeting password

Press **Menu** on the Bridgit Collaboration Bar, and then select **Hide Password**.

The password displays as a string of asterisks (*), and the option changes to *Show Password*.

NOTES

- This procedure hides the meeting password on only the local meeting room Bridgit Collaboration Bar.
 - When the password is hidden, you can press the string of asterisks to display the password temporarily.
-

Setting up audio in a Bridgit meeting

Depending on how Bridgit software is configured, you either use Voice over Internet Protocol (VoIP) or voice bridge for audio.

▶ To set up VoIP

1. Press **Menu** on the Bridgit Collaboration Bar, and then select **Open Audio Settings**.

The *Audio Settings* dialog box appears.

 **NOTE**

If the *Open Audio Settings* option isn't available, the settings are disabled or your Bridgit system is using a third-party voice bridge. Contact the Bridgit administrator.

2. Press **Open My Mic**  to enable your microphone.

The button label changes to *Close Mic*. Press it to mute your microphone.

 **TIP**

Alternatively, you can press **Microphone**  on the Bridgit Collaboration Bar to enable or disable the microphone.

3. Press the **Speaker** or **Mic** buttons to change the audio settings.
4. Drag the sliders for the speaker and microphone to adjust the volume and microphone sensitivity.

 **To set up voice bridge**

1. Press **Menu** on the Bridgit Collaboration Bar, and then select **Set Voice Bridge Details**.

The *Set Voice Bridge Details* dialog box appears.

 **NOTE**

If the *Set Voice Bridge Details* option isn't available, the settings are disabled or your Bridgit system is using VoIP audio. Contact the Bridgit administrator.

2. If you want to show telephone conference details to users, select **Share Voice Bridge details with other users**.

The *Telephone number* and *Conference code* text boxes become available.

3. Type the telephone number and conference code in the text boxes.
This information is included in the email invitations to the meeting.
4. Press **OK**.

Sharing your desktop in a Bridgit meeting

You can share images, videos and written information with other participants by sharing your desktop using the Bridgit Collaboration Bar.

▶ To share your desktop

1. Create or join a meeting.
2. Press **Share Screen**  on the Bridgit Collaboration Bar.

A *Preparing to share your desktop* message appears briefly, and then a blue border appears on your screen. Anyone in the meeting can see your desktop.

▶ To share when using multiple displays

1. Create or join a meeting.
2. Press **Share Screen**  on the Bridgit Collaboration Bar of each screen that you want to share.

A *Preparing to share your desktop, please wait* message appears briefly, and then a blue border appears on your screen. Meeting participants see each screen organized in the order you shared them.

▶ To stop sharing your desktop

Click the **Stop Sharing**  button on the Bridgit Collaboration Bar of the display you want to stop sharing.

Interacting with a shared desktop during a Bridgit meeting

You can view and make notes on the screens of meeting participants who are running SMART Meeting Pro software and Bridgit software and who have a connected SMART interactive product. SMART Meeting Pro software also has a multiple-display sharing feature that allows you to choose which display to view.

▶ To view the screen of a meeting participant

Press **View Screens**  on the SMART Business Toolbar.

If one of the meeting participants pressed the **Share Screen** button, that participant's screen appears.

If no one is sharing a screen, a Bridgit window appears showing the conference name.

 **TIPS**

- You can use the pen and eraser tools to draw, make notes and erase notes on a participant's screen. You can also press **Capture**  to copy the screen to the Whiteboard drawing area.
 - If you have multiple screens connected to your computer, you can use View Screens mode on each of your monitors to view more than one participant screen at a time.
-

Viewing and chatting with participants in a Bridgit meeting

The Participant Counter on the Bridgit Collaboration Bar shows the number of participants in the current meeting. You can view a list of participants while your meeting is in progress.

You can also send an email invitation or use the chat window in the participant list to broadcast messages to some or all participants in a meeting.

To view a list of meeting participants

Press **Participant Counter**  on the Bridgit Collaboration Bar.

The *Participants* dialog box appears, showing your computer's name as the meeting owner. The list on the left displays all meeting participants.

To send an email invitation

1. Press **Participant Counter**  on the Bridgit Collaboration Bar.

The *Participants* dialog box appears, showing your computer's name as the meeting owner.

2. Press **E-mail Invitation** in the lower-left corner of the dialog box.

The *Invite Participant* dialog box appears.

3. Press **E-mail**.

Your default email program opens an email form that includes the details of your meeting.

4. Type the email address of the recipient in the *To* box, and then send the email.

▶ **To send a message to all participants**

1. Press **Participant Counter**  on the Bridgit Collaboration Bar.

The *Participants* dialog box appears, showing your computer's name as the meeting owner.

2. Type the message in the box under the *All Users* area.
3. Press **Send**.

▶ **To chat privately with certain participants**

1. Press **Participant Counter**  on the Bridgit Collaboration Bar.

The *Participants* dialog box appears, showing your computer's name as the meeting owner.

2. Press **Chat**  next to the participant you want to chat with.
3. Select **Create a New Conversation with Participant**.

A tab that contains the participant's name appears in the chat window. Any text you send or receive under this tab is visible only to those in the private conversation.

▶ **To add more participants to a private conversation**

1. Select the conversation to which you want to add a participant.
2. Press **Chat**  next to the person you want to add.
3. Select **Add Participant to Selected Conversation**.

 **NOTE**

If you have multiple private conversations running at the same time and a new message arrives in a conversation that isn't selected, the chat balloon icon appears with horizontal lines.

▶ **To end a private conversation**

Press **Exit**  on the tab you want to close.

Sharing and viewing webcams in a Bridgit meeting

If you have a compatible webcam, you can share its view with other participants in your Bridgit meeting. Even if you don't have a webcam, you can still view the webcams of other participants. Up to nine participants can share their webcams at the same time.

If the presenter of the conference disables remote webcams, you can't share your webcam. However, you can still see the presenter's webcam if it's shared.

NOTE

This feature is available only when the Bridgit administrator enables it on the server. Before you share your webcam, make certain that no other program is using it.

To open the Video window

Press **Menu** on the Bridgit Collaboration Bar, and then select **Open Video window**.

The *Video* window appears.

To share your webcam

Press **Share My Webcam** .

NOTES

- As other participants share their webcams, they appear along the bottom of the larger image. When you hover the mouse over one of the smaller images, a message appears showing you the name of the person sharing that webcam.
 - You can click one of the smaller images to expand it.
-

To stop sharing your webcam

Press **Stop Sharing My Webcam** .

Your webcam no longer appears in the *Video* window. If other participants are still sharing their webcams, they remain visible.

 **NOTE**

There may be times when the Video window covers items on the screen you want to see. You can move the Video window, or close it and then open it again later.

▶ **To close the Video window**

Press **Close** .

Joining another Bridgit meeting

You can join another Bridgit meeting that was created by someone else.

If you don't know the meeting password, you can still join the meeting by searching for the meeting you want to attend, knocking for meeting access, and then obtaining access from other meeting participants.

▶ **To join another meeting**

1. Press **Menu** on the Bridgit Collaboration Bar, and then select **Join Another Meeting**.

The *SMART Bridgit Software* window appears and connects to the last server you used.

 **NOTE**

If you haven't used Bridgit software before or if you want to connect to a different server, follow the steps in the next procedure.

2. Select the meeting you want to join from the *Meeting name* drop-down list, and then enter the meeting password.
3. Select **Yes** under *Do you want to use your computer for meeting audio?* if your system administrator has enabled VoIP.

OR

Select **No** if you will be using another audio option.

4. Click **Join Meeting**.

▶ **To join another meeting with a knock**

1. Press **Menu** on the Bridgit Collaboration Bar, and then select **Join Another Meeting**.

The *SMART Bridgit Software* window appears and connects to the last server you used.

 **NOTE**

If you haven't used Bridgit software before or if you want to connect to a different server, follow the steps in the next procedure.

2. Select the meeting you want to join from the *Meeting name* drop-down list.
3. Select **Yes** under *Do you want to use your computer for meeting audio?* if your system administrator enabled VoIP.

OR

Select **No** if you will use another audio option.

4. Click **Knock to Join**.

A message appears stating that you're waiting for a response from the meeting participants. Participants in the meeting receive a message asking them to allow or deny you access to the meeting.

- If you're allowed access to the meeting, your screen automatically updates to view the shared screen.
 - If you're denied access to the meeting, the *Unable to join* message appears.
5. If you're denied access, click **OK** to knock again or try to contact a meeting participant for the meeting password.

▶ **To change which server you're connected to**

1. Click the server icon  in the bottom-left corner of the *SMART Bridgit Software* window.
The *Server Information* dialog box appears.
2. Type the server name in the *Which server do you want to connect to?* box, or select a server from the drop-down list.

 **TIP**

If you've previously used a Bridgit software server, it appears in the *Which server do you want to connect to?* list. This makes it easy to connect to servers you've used before without typing the server name again.

3. Click **Connect**.

Joining Bridgit meetings remotely

Remote meeting participants can join your Bridgit meetings using the following options:

- A remote meeting room with a SMART interactive product and SMART Meeting Pro software
- A personal computer with SMART Meeting Pro software personal license and Bridgit software
- A personal computer with Bridgit software only

The following table shows the available features for these options:

Feature	SMART Meeting Pro room license	SMART Meeting Pro personal license	Bridgit software only
Communicating through video, audio and chat	Yes	Yes	Yes
Sharing your desktop	Yes	Yes	Yes
Viewing and taking control of other meeting participants' shared desktops	Yes	Yes	Yes
Writing or drawing digital ink on other meeting participants' shared desktops	Yes	Yes	Yes
Opening Whiteboard (.fcw) files during meetings	Yes	Yes	No

Remote participants without access to SMART Meeting Pro software or SMART Meeting Pro PE software can download Bridgit software by completing the following procedure.

 **NOTE**

You must know the Bridgit server URL and the meeting name.

▶ **To connect from a web browser**

1. Type your Bridgit server URL in the address bar of your web browser.
2. Click the **Download Software** link.

The *File Download - Security Warning* dialog box appears.

3. Click **Run**.

The *Internet Explorer - Security Warning* dialog box appears.

4. Click **Run**.

The *SMART Bridgit Software* window appears.

5. Type or select the meeting name in the text box.
6. Type the password (if applicable).
7. Click **Join Meeting**.

Maintaining Bridgit software

Changing meeting settings

You can select several options to control how you and other meeting participants can use Bridgit software features during a meeting.

You can change these settings only if you are the meeting owner.

To change meeting settings

1. Press **Menu** on the Bridgit Collaboration Bar, and then select **Advanced Settings**.
The *Options* dialog box appears.
2. Press the **Meeting settings** tab.

3. Change settings:

Control	Procedure	Notes
Require others to request microphone	Select the check box to require meeting participants to request the microphone to speak.	N/A
Allow others to draw	Select the check box to enable meeting participants to draw on your screen.	N/A
Allow others to share their desktop	Select the check box to enable meeting participants to share their screens.	N/A
Allow others to share their webcams	Select the check box to enable meeting participants to share their webcams.	N/A
Allow remote control of your desktop	Select the check box to enable meeting participants to take control of your screen.	This check box is only available if you are currently sharing your screen.
Allow others to raise their hand	Select the check box to enable meeting participants to use the raise hand feature to ask questions.	N/A
Allow others to knock to join the meeting	Select the check box to enable meeting participants to join the meeting by knocking.	N/A
Allow others to use chat	Select the check box to enable meeting participants to chat.	N/A
Allow others to use private chat	Select the check box to enable meeting participants to set up private chat.	This check box is only available if you also selected the Allow others to use chat check box.

4. Press **OK**.

Changing audio settings

You can configure audio settings for SMART Meeting Pro software.

▶ To change audio settings

1. Press **Menu** on the Bridgit Collaboration Bar, and then select **Advanced Settings**.

The *Options* dialog box appears.

2. Press the **Audio Settings** tab.

3. Change settings:

Control	Procedure	Notes
Sounds when users join/leave	Select the check box to play sounds when participants join or leave the meeting.	N/A
Speakers	Select the computer's audio output that you want to use for the speakers.	If you're unsure of which audio output to use, press Audio Setup Wizard to run the <i>Audio Setup</i> wizard.
Microphone	Select the computer's audio input that you want to use for the microphone.	If you're unsure of which audio input to use, press Audio Setup Wizard to run the <i>Audio Setup</i> wizard.
Audio optimization settings	Select Optimize for high audio quality to optimize audio for higher quality. OR Select Optimize for low bandwidth to optimize audio for low bandwidth.	These option buttons are only available if you are the meeting owner.

4. Press **OK**.
